IDENTIFIERS	Integrated Postsecondary Education Data System; *Nebraska; University of Nebraska

ABSTRACT

This report presents comparative data on postsecondary education in Nebraska in 1996. Data tables, analyses, and charts are grouped as follows: fall headcount enrollment, including freshmen residence; degrees awarded; institutional finance; faculty salaries; and private career schools. Headcount data cover full- and part-time students, race and ethnicity, and county or state of residence for the years 1990-96. Degree awarded data covers 10 years; degrees by ethnicity is given for 1995-96; major program areas are covered for 5 years. Institutional revenues and expenditures data is shown separately for public postsecondary institutions and for independent colleges and universities. Data on full-time instructional faculty by rank is given for 10 years. A 10-year summary of average salaries of full-time instructional faculty is given for each of the institutional sectors: the University of Nebraska, Nebraska state colleges, community colleges, and independent colleges and universities. Faculty data covers the years 1987-96; private career school enrollment and degrees-granted data covers the period 1995-96. Nebraska private career schools that do not utilize Title IV funds are not included in this report. Five appendices show complete data. (BF)

INTRODUCTION

The information in this report was taken directly from the IPEDS (Integrated Postsecondary Education Data System) survey forms. Some enrollment information is from the Nebraska Education Data System (NEEDS). The report provides statistical data with analytical summaries related to headcount enrollment, degrees awarded, institutional finance, and full-time faculty data at Nebraska's 14 public and 17 independent colleges and universities. The public and independent institutions of higher education in Nebraska provide the data annually at the request of the U.S. Department of Education. The Nebraska private career postsecondary schools that completed the IPEDS Consolidated Survey are included to provide profiles on enrollment and degree completions and other awards. Nebraska Private Career Schools that do not utilize Title IV funds are not in this report.

The purpose of this document is to provide data and to report analytical findings on postsecondary education in Nebraska. Using comparisons with past years, the report focuses upon persistent trends and significant changes that appear in the data. In several cases, the Nebraska data are compared to national norms. All numerical comparisons are based on IPEDS and NEEDS data. The analytical discussion is enhanced by graphics. Data used for the analytical discussion are identified in the accompanying appendices.

Because Kearney State College became the University of Nebraska at Kearney in July 1991, careful attention is given to the assignment of that institution. For direct, system-wide comparisons and where it was practical for the data handling, Kearney data were consistently assigned to the University of Nebraska system. There are exceptions to this placement. Any exceptions are identified in the text and in the appendix tables. Also, the Nebraska College of Technical Agriculture (NCTA) at Curtis is split out as a distinct entity beginning with the Fall 1992 survey data. Prior to this time, the NCTA - Curtis data were maintained on the Commission's computer files as a part of the accumulation for the University of Nebraska - Lincoln.

In 1996 the records and office for the Nebraska Indian Community College were moved from Winnebago to Macy, Nebraska. The reporting for the Macy office is included in this report as the continuation of the Nebraska Indian Community College. Simultaneously, the school at Winnebago, Nebraska was renamed the Little Priest Tribal College. For 1996 IPEDS reporting, Little Priest information was reported as part of the Wayne State College returns. Little Priest Tribal College is currently seeking accreditation.

The Coordinating Commission for Postsecondary Education appreciates the efforts and cooperation of registrars, business officers, private career school officials and IPEDS coordinators at the numerous institutions. Questions relative to the analytical summaries, the IPEDS data or the Nebraska private career schools survey should be directed to Dr. John A. Ingram, Research Officer.

EXECUTIVE SUMMARY
of
A Factual Look at
Higher Education in Nebraska

Headcount Enrollment

The 1996 total Fall headcount enrollment for Nebraska's 31 public and independent postsecondary education institutions was 110,876 students. This was a slight (1.5%) increase over the 1995 enrollment (109,214). It reflects an average annual increase of 0.7% for the 5-year period of 1991-1996. Full-time students comprised 60.5% of the Fall 1996 total headcount enrollment, as compared to 58% in Fall, 1995 and 57% in Fall 1994. The enrollments reported are for the Fall term of each year.

The distribution of the Public and Independent College and University total headcount enrollment by sector for Fall 1996 was: University of Nebraska 44%; Community Colleges 30%; Independent Colleges and Universities 18%; and State Colleges 8%.

Enrollment Changes for the Institutional Sectors (See pages 1-5)

In total, the University system Fall headcount enrollment has been relatively stable from Fall 1987 through 1996. The full-time headcount enrollment increased from 32,359 to 34,918, for an average annual increase of 0.9%. In this same time, the part-time enrollment, which represented 29% of the Fall 1996 University enrollment, experienced an average decrease of 1.4% per year. In Fall 1992, the total University enrollment was an all time high 52,112 students. Since 1992, it has experienced a gradual and regular decrease.

From Fall 1987 through 1996, the total headcount enrollment for the Nebraska State Colleges (excluding Kearney) increased from 6,545 to 8,507 by 1,962 students or 30%. This change equates to an average annual increase of 218 students. Full-time enrollment at the State Colleges increased each year from Fall 1987 through Fall 1994. It remained constant for Fall 1994-1996. Meanwhile, part-time enrollment increased through Fall 1991, then slowly decreased. For 1987-1996 the Fall part-time enrollment has increased by 315 students. The principal growth at Nebraska State Colleges is full-time students.

The Community College system differs from the University and State Colleges in that 67% of that sector's 1996 total Fall headcount enrollment was part-time students. In comparison, part-time students made up 28% of the combined enrollment for Nebraska's State Colleges, the University and the Independent Colleges and Universities. The high number of part-time students in the Community College system has been an ongoing pattern. For 1987, the part-time headcount enrollment was 64% of total; 71% in 1990, and in 1996 it was 67%. For Fall 1987-1996, the Community College full-time Fall enrollment increased by 2,537 (23%) and the part-time enrollment increased by 6,916 (45%).

The Independent Colleges and Universities' Fall total enrollment patterns show steady, modest increases, up an average of 2.8% annually for the years 1987-1996. For Fall 1996, the Independent Colleges and Universities had 76% full-time enrollment of a total headcount enrollment of 19,974 students. Fall term full-time enrollment increased each year from 1987 through 1996. For Fall 1987-96, part-time enrollment increased until 1991, then came down. For Fall 1987-1996 the net result was a slight increase (2%) in Fall part-time headcount enrollment for Nebraska's Independent Colleges and Universities .

Headcount Enrollment (IPEDS) and FTE Enrollment (NEEDS) (See pages 6-8)

IPEDS presents a snapshot of Fall enrollment at Nebraska's Public and Independent Colleges and Universities. The Nebraska Educational Data System (NEEDS) provides a complement in Spring term headcount enrollment numbers and an "Annual" full-time equivalent (FTE) enrollment. Historically, "annual" was defined for the University and State College institutions to be the academic year. Community College areas report "annual" enrollments that include the academic year plus summer. Fall and Spring (I87) surveys capture headcount enrollments. The Fall, Spring and "Annual" surveys collect student credit and contact hours. These credit/contact hour numbers are the basis for calculating FTE enrollments. Appendix A, Tables A8 and A9 include the 1995-96 "Annual" and Spring survey summaries, respectively. The "Annual" survey (I87A) is completed in August, so the most current year with completed surveys was 1995-96. Because NEEDS applies only to the Nebraska public postsecondary institutions, this discussion excludes the Independent Colleges and Universities.

Headcount enrollment for the Nebraska Public Colleges and Universities for Fall 1995 versus Spring 1995-96, increased from 90,902 to 95,116, or 4.6%. This increase is unusual. A common pattern exists for the University and State College sectors, with the University decreasing 4%, and the State Colleges decreasing by 7% in headcount enrollment from Fall to Spring. This is a typical pattern. Compared to spring, the fall term typically has the higher enrollment. The unusual change was a substantial increase in part-time enrollment for Spring over Fall at the Community Colleges. This is more completely described on page 8 and by numbers in Tables A2 and A9.

Enrollment by Race/Ethnicity (See pages 10-13)

The 1990 race/ethnic classification headcount enrollment in Nebraska's Public and Independent Colleges and Universities included: 94.4% White; Non-Hispanic students and 5.6% from race/ethnic minority classifications. This rate (5.6%) was lower than the 1990 minority rate for the Nebraska population which was 6.3%. In 1990, the Black, Non-Hispanic group represented the largest number of minority students, making up about 2.5% of total enrollment. This was followed by Hispanic with 1.4%, Asian/Pacific Islanders with 1.1%, and American Indian with 0.7%. For 1990-1996, those percentages increased for all categories of minority, non-white enrollment. The Fall 1996 rates were Black, non-Hispanic 3.2%, Hispanic 2.1%, Asian/Pacific Islanders 2.1%, and American Indian 0.9%.

The percentage of racial or ethnic minority headcount enrollment for Fall 1996 was, by sector: 10.3% for the Independent Colleges and Universities, 9.2% for the Community College sector, 7.3% for the University sector, and 5.8% for the State College sector.

In Fall 1996, the University sector comprised 43% of Nebraska's Public and Independent Colleges and Universities headcount enrollment and 38% of its known ethnic minority students. The comparable rates for the other sectors were: State Colleges, 0.8% of enrollment and 5.5% of minority enrollment; the Community Colleges, 31% of enrollment and 34% of minority enrollment; and Independent Colleges and Universities, 18% of the enrollment and 22.5% of the total ethnic minority postsecondary enrollment. These are very similar to 1995 rates. The University and State Colleges sectors enrolled a lower percentage of race/ethnic minority students in proportion to their total enrollments, while the Community Colleges and Independent Colleges and Universities enrolled more race/ethnic minority students in proportion to their total enrollment. These numbers exclude Non-resident alien students and ones with unknown race/ethnicity. The percentage of Non-resident alien continues to grow. In Fall 1990 this group was 1.0% of the Nebraska postsecondary enrollment. In Fall 1996 it was 2.5%.

Enrollment Profiles (See page 14)

Tables A16A and A16B are (Appendix A) are new enrollment profile tables that provide data showing the contribution an individual institution (or sector) made to the total enrollment for its sector over the most recent 5-year period, and how enrollment changed for an institution (or a sector) over the past five years. Tables are available from CCPE staff for (5-year) profiles on total, full-time, part-time, by gender, or by (5 separate) race/ethnicity enrollment categories.

Freshmen Residence (See pages 15-16)

Freshmen residence is reported in even numbered years, therefore, this report includes freshmen residence for 1990, 1992, 1994 and 1996. In time this survey can track geographical change, either by state or by county, for Nebraska residents over a 10-year period. A first complete cycle, available in year 2000, will cover the years 1990-2000.

These tables are by institution, not sector, and require 4 pages per institution. Due to the substantial paper requirement to show all 31 public and independent colleges and universities, this report displays for only one institution per sector. (See Appendix A tables A17 through A24.) Data for the remaining 27 institutions are on file and reports are available upon request.

A few summary statements on UN-Kearney illustrate the kinds of information available for a first-time residence tracking over time. In 1996, 87.9% of UN-Kearney's first-time enrolled Fall freshmen were Nebraska residents. The percentages for 1990, 1992 and 1994 were 92.2% , 91.7% and 90.3%. For these years, UN-Kearney's in-state enrollment as a percentage of total enrollment has decreased. Two states - Colorado and Iowa-in that order, have provided the largest numbers of "other" state first entrants to UN-Kearney for each year 1990-1992-1994 and 1996.

The county data indicate that Nebraska residents compromised 88% or more of the UN-Kearney first-time freshmen enrollment for each of Fall 1990-1992-1994-1996. These counts are widely spread across Nebraska, with at least one person entering from 84 or more of Nebraska's 93 counties for each year. The highest counts were for the counties near, where UN-Kearney is located. For 1996, the largest counts (percents) were from Buffalo 207 (17.2%), Douglas 88 (7.3%) and Hall 87 (7.2%) counties.

Data on enrollments in the Appendix A tables can provide a reference for the analysis and graphics.

Degrees Awarded

From 1986-87 through 1995-96, the number of degrees granted by Nebraska's Public and Independent Colleges & Universities increased from 15,395 to 17,991. This was a 16.9% increase. For the most recent 5-year period from 1991-92 through 1995-96, the number of degrees increased from 17,229 to 17,991, a 4.4% increase. The number of degrees awarded increased each year from 1986-87 through 1994-95. It decreased from 18,496 in 1994-95 to 17,991 in 1995-96.

For the five-year period of 1991-92 through 1995-96, the relative percentage of all degrees granted was stable. Degrees requiring less than 2 years of training ranged from 25% to 28% of the total; bachelors degrees were 55%; masters degrees ranged from 11% to 14%, and first professional/doctoral degrees were a constant 6% of the total. Post-baccalaureate certificate and post-masters certificate programs each provide less than one percent of the total.

Degrees and Other Awards by Degree Level and Major Discipline Groupings for Nebraska's Public and Independent Colleges and Universities (See pages 18-20, 23-27)

The following identifies the predominant major discipline areas statewide by degree level for the academic years 1991-92 through 1995-96:

- At the associate and shorter term level, the most common choices for major program completers were vocational, which annually graduated 23% to 26% of the 2-year completers; and business, which graduated from 20% to 25% of the 2-year completers. Other common choices were health, with 17% to 20%; and general arts and sciences, with about 10% of each year's associate and lower level degrees. For 1995-96, the most common associate/certificate degree completions were in vocational studies with 1,042 completers; health with 905; and business with 848 completers.

- For baccalaureate degrees, the largest numbers of graduates for 1991-92 through 1996-97 were in business, which accounted for 25% to 27%; social sciences with about 17%; and education with 14.6% to 16% of the total for each year. Other disciplines that have consistently graduated relative higher percentages of the baccalaureate degrees are humanities, 10% to 12%; physical science/engineering, 8% to 11%; and health 8% to 11%.

- For 1991-92 through 1995-96, at the masters level education consistently accounted for 37% to 42% of the degrees awarded. Business was second with 13% to 20%, followed by social sciences with 10% to 12.5%. In 1995-96, education accounted for 39% of the masters level degrees, another 18% were in business, and 13% were in social science disciplines.

- Post-masters degrees continue to be awarded primarily in health and humanities, with approximately 30 to 40 per year. For 1995-96, there were 75 post-masters degrees granted; 41 were in health and 34 were in education. The increase of about 40 in 1994-95 was postmasters in nursing at UNMC (33) and at Clarkson College (8).

- The numbers for first professional degrees conferred show very little variation for this five-year period. For 1995-96, law was 39%, medicine 28%, pharmacy 18%, and dentistry 15% of the total number of first professional degrees.

- Doctoral degrees were primarily in education (27%) and life sciences (24%) in 1995-96. Physical science and engineering accounted for 15% of the doctoral degrees, social sciences 13%, the humanities 9%, health 5%, business 5% and general arts and sciences, (1%).

- Considering all degrees granted at Nebraska's Public and Independent Colleges and Universities, business was the discipline with the largest number of degree completions (3,742) followed by health (2,656), education (2,468), and social sciences (2,226). These four disciplines accounted for 62% of the 1995-96 degrees and awards.

- At Nebraska Independent Colleges and Universities, the predominate choices for degree completers are business, and health sciences. There were 1,276 business degrees and 933 health science degrees granted in 1995-96 by Nebraska Independent Colleges and Universities. Education was a distant third with 618 completers.

Degrees and Other Awards by Race/Ethnicity (See pages 21-22)

Of the 1995-96 Nebraska completers of degrees and awards with known race/ethnic background, 91% were White Non-Hispanic, 2% were Black Non-Hispanic, 4% were Non-Resident Aliens, 2% were Asian/Pacific Islanders, another 1% were Hispanic, and 1% were American Indian or Alaskan.

Postsecondary degrees conferred at Nebraska's Public and Independent Colleges and Universities in 1995-96 can be characterized as follows regarding race/ethnic minority persons:

- Of the 380 degrees and awards conferred to Black Non-Hispanic persons, 24% were associate/certificate awards, 58% were baccalaureate degrees, and 18% were masters or more advanced degrees.
- 58% percent of the 102 American Indian/Alaskan Native completers received associate degrees or certificate awards.
- 50% percent of the 286 Asian/Pacific Island completers received bachelors degrees and another 33% attained masters or more advanced degrees.
- Of the Hispanic group, 21% were associate/certificate completers, 56% attained bachelors degrees, and 23% received a masters or a more advanced degree.
- Non-Resident Alien persons earned more degrees in Nebraska than were received by any other one race/ethnic minority group. Non-Resident Aliens received 620 degrees, of which 46% were bachelor degrees and 49% were masters or more advanced degrees.
- Non-Resident Alien persons had the second largest number of completers receiving bachelors, masters, first professional, and doctoral degrees (white Non-Hispanic were first), but had fewer associate degrees and certificate awards than any race/ethnic group. The profiles for Black, Non-Hispanic and Hispanic categories showed very similar percentages for below baccalaureate, baccalaureate, and masters and higher degrees.

Data on degrees awarded in the Appendix B tables can provide a reference for the analysis and the graphics.

Institutional Finance

The IPEDS finance survey collects data on institutional revenue and expenditures at each Nebraska Public and Independent College or University. Because their funding sources are very different, this report provides separate finance information about the Nebraska Public Institutions, and the Independent Colleges and Universities.

Nebraska Public Institutions - Revenue (See pages 28-31)

State appropriations for Nebraska's public institutions increased from $31.8 million in 1990-91 to $37.8 million for 1995-96. This is an increase of 19% in five years. For 1995-96, state appropriations were the major revenue source - 31.6% of total revenue - for Nebraska's Public Postsecondary Colleges and Universities.

Nebraska's public postsecondary education revenues from student tuition and fees were up 40% for 1995-96 over 1990-91. Student tuition and fees were

12.7% of total revenues for 1995-96. [1] Nebraska's tuition and fees revenues, at 13.0% of total in 1993-94, were lower than the United States norm of 18.4% of revenue. The percentage of education cost paid by Nebraska public postsecondary students was lower than the national norm.

For 1993-94, Nebraska's revenue from the hospital operations produced a substantially higher portion of annual total revenue (18.2%) compared to the United States norm of 10.8%. In 1995-96, the Nebraska revenue from University Hospital, 20.1% of total revenues, was higher than in 1993-94.

For Nebraska's public colleges and universities, federal grants and contract dollars went from $85.4 million in 1990-91 to $116.2 million for 1995-96. For 1995-96, the federal grants percentage of Nebraska's total revenues was 9.7%, up from 9.1% in 1994-95 and down from 9.8% in 1993-94. For 1993-94, the national norm was 11.0%.

Relative to a U.S. profile of revenue, a recurring characteristic is the relative lower percentage of total revenues provided by tuition and fees in Nebraska public postsecondary education. Nebraska's 1993-94 percent of revenues from the University Hospital (18.2%) exceeds the U.S. norm for hospitals (10.9%).

Nebraska Public Institutions - Expenditures* (See pages 32-34)

For 1995-96, instructional expenditures at Nebraska's public institutions were 26.1% of the total. The Nebraska 1993-94 rate was 27.6%. This was lower than the U.S. rate of 32.6%.

For 1990-91 through 1995-96, dollar expenditures for research increased by 23.7%. In 1990-91, research accounted for 10.1% of the total expenditures, while for 1995-96 it accounted for 9.5% of the total.

For 1990-91 through 1995-96, the principal change in Nebraska public institution expenditures was higher percentages of total expenditures going for the University Hospital and auxiliary enterprise, with reductions in percentages for instruction, and plant operation and maintenance.

*Hospitals are an unusual budget item for Nebraska. The data tables on pages 29 and 33 hold out public institution hospitals and auxiliary enterprises for a comparison of the remaining institutional finance sources with the U.S. norm. With this qualification, Nebraska revenue percents for 1993-94, were below the U.S. norm for tuition/fees and similar to the U.S. norm for state appropriations. Nebraska was higher in the percents of revenues from local appropriations and private gifts and grants. Relative to a U.S. norm, the 1993 Nebraska public postsecondary institution percentages of expenditures were higher for public service and scholarships/fellows, but lower for instruction and academic support.

Nebraska Independent Colleges and Universities - Revenue (See pages 35-37)

Because none of the Nebraska Independent Colleges and Universities operate hospitals, it was not necessary to have a comparison to the U.S. norm that would hold out hospital expenses.

---

[1] Digest of Education Statistics, October, 1996. 1993-94 was the most recent year for which a national summary was provided for IPEDS data.

For 1990-91 through 1995-96, actual dollars received from tuition and fees increased from $109.7 million to $171.4 million, a 56% increase over 5-years. As a percentage of total revenues, this source increased from 42.8% to 48.5%. Nebraska's Independent Colleges and Universities depend on tuition and fees as the major source for revenue.

In 1995-96, private gifts and grants at 9.7% were the second largest identifiable source of revenues for Nebraska Independent Colleges and Universities. The medical/hospital related revenues and services for educational activities were somewhat confounded in the data provided by Creighton University. See Table C28.

Nebraska Independent Colleges and Universities - Expenditures (See pages 37-39)

For 1993-94, 26.7% of U.S. private college expenditures were for instruction. Meanwhile, Nebraska's Independent Colleges and Universities spent a significantly higher percentage, about 41.3%, for instruction. The Nebraska rate for 1995-96 dropped slightly to 40.5%.

In 1990-91, the Nebraska Independent Colleges and Universities financial support in scholarships and fellowships was 12.8% of the total, versus 9.2% for the U.S. norm. For 1993-94, the Nebraska rate was 14.0% while the U.S. rate was 11.0%. In 1995-96 the Nebraska rate was 14.2% of total expenditures. An increase percentage of the Nebraska Independent College and University budget goes toward student scholarships and fellowships.

Areas where Nebraska's Independent Colleges and Universities were below the 1993-94 United States norm for percentage of expenditures include research, auxiliary enterprises and plant maintenance and operation. Hospitals were, and remain, an undefined expenditure source. See Table C 28.

The data on institutional finance in Appendix C tables can provide a reference for the analysis and the graphics.

Faculty Salaries

Number of Full-Time Instructional Faculty by Rank and Gender (See pages 41-42)

For Nebraska Public and Independent Colleges and Universities, the number of full-time instructional faculty increased from 3,405 in Fall 1987 to 4,072 in Fall 1996. This is an increase of 19.6% for ten years.

Since 1990, there has been an increase of 9.6% in the number of professors, and 16.7% in the number of associate professors. In this same six years, the number of assistant professors increased by 3.0%. In Fall 1996, there were more professors than assistant professors and more assistant than associate professors. Between 1990 and 1994, the number of professors was less than the number of assistant professors. The number of full-time instructional staff who are professors continues to be an increasing percentage of the total.

In Fall 1996, there were 1,041 professors at Nebraska's Public and Independent postsecondary institutions, of which 13% were females; 1,005 associate professors, of which 27% were females; 1,014 assistant professors, of which 48% were females; 277 instructors, of which 53% were females; and 725 positions of no academic rank, of which 39% were females. The percent of male full-time instructional faculty increased directly with the academic rank during the period studied.

For Fall 1996, the number of instructor rank females (147) exceeded the number of males (130).

From 1987 to 1996, there was a reversal in the number of full-time instructors and the number of full-time no academic rank assigned positions. In Fall 1987, there were 714 instructors and 197 no rank assigned positions. In Fall 1991, there were 344 instructors and 638 positions with no academic rank assigned. In 1996, there were 277 instructor positions and 687 positions with no academic rank assigned. This reversal reflects a change in the assignment of titles uniformly made by the Nebraska Community Colleges.

A Ten-Year Summary of Average Salaries of Full-Time Instructional Faculty by Year and for Institution Sectors (See pages 43-45)

Sector (Table D1) and institution average salaries (Table D2) demonstrate increases for 1987 through 1996. The University of Nebraska, with a 57.5% overall increase, had the most increase, going from $33,036 in Fall 1987 to $52,032 in Fall 1996. Note: all salaries are computed on a 9-month basis. The comparable increases for other sectors were: Nebraska State Colleges, 47.6%, Community College Areas, 43%, Nebraska Independent Colleges & Universities, 52.4%.

Relative to their Fall 1987 average salaries, the University of Nebraska has received substantial salary increases compared to full-time faculty at the remaining sectors. The relative changes appear in the graphic on page 47. Of interest is the distance (separation) over time between the graphs going from 1987 to 1996.

Average Salaries of Full-Time Instructional Faculty by Rank and Gender (See pages 46-51)

Although some improvement was made in increased percentages of full-time female faculty, little improvement was made in salary equity. The following shows the percent of male faculty salary earned by women with the same rank:

	Year (Fall Term)		
Rank	**1986**	**1991**	**1996**
Professor	91%	88%	86%
Associate Professor	95%	91%	92%
Assistant Professor	91%	89%	97%
Instructor	92%	95%	95%
No Academic Rank	92%	93%	93%

At the professor and associate professor ranks, women lost earning power, relative to their male counterparts, going from 91% in 1986 to 86% in 1996 of the male professor's average salary. For 1986 to 1996, only the assistant professor rank shows women made a perceptible gain toward pay equity with their male counterparts.

Average Salaries of Full-Time Instructional Faculty Adjusted for Inflation (See pages 52-53)

An evaluation of all Nebraska Public and Independent Colleges and Universities for the years 1990 through 1996 shows average salaries for full-time faculty who were professors increased from $50,757 to $61,427. This is an increase in actual dollars of 21%, for an average annual increase of 3.5%. For a measure of the change in buying power for increased salaries, the Consumer Price U-index (CPI-U) was used as a price deflator with 1990 as the base period. The 1996 average salaries for full-time professors adjusted by the CPI results in an average increase in buying power from 1990 of 0.4% per year for professors, -0.2% for associate professors, -0.7% for assistant professors, 0.2% for instructors and 0.8% for no academic rank.

The data on faculty salaries in Appendix D tables can provide a reference for the analysis and graphics.

Nebraska Private Career Schools

There are about sixty Private Career Schools in Nebraska. Twenty-two of those schools completed the Fall 1996 IPEDS Institutional characteristics survey. Of the 22 reporting Private Career Schools, four (18%) do not participate in federally funded loan programs so they are not required to provide enrollment, degree completer and institutional finance reports. Those schools are: *Custom Diesel Drivers Training, Inc., Omaha, Educational Management Inc., Lincoln, North American Travel School, Omaha, Randall School of Real Estate, Omaha.* The remaining 18 Nebraska Private Career Schools provided Fall Headcount enrollments for 1996 and number of degrees and other formal awards for Fiscal 1995-96, which are summarized in this report. The Private Career Schools included in this report are those that are eligible to participate in federal financial assistance programs authorized by Title IV of the Higher Education Act of 1965.

Enrollments (See page 54)

Headcount enrollment was available from the IPEDS surveys for full-time and part-time status, gender, and race/ethnicity categories.

For the 18 reporting Private Career Schools, the total headcount enrollment was 2,267 students. Of these students, 2,072 (91%) were enrolled full-time. Eighty-one percent of those enrolled were women.

Relative to the 1990 Census of Population, the distribution of Private Career School students age 18+ by race/ethnicity reflects a higher percentage of White, Non-Hispanic and Black, Non-Hispanic persons, and a lower percentage of Asian/Pacific Island and Non-Resident Alien persons.

Completions (See page 55)

The number of degrees and other formal awards granted was available from IPEDS surveys for categories including gender and race/ethnicity.

Of the 1,205 completers reported for Nebraska Private Career Schools, 1,011, or 84 %, were women.

Ninety-nine percent of the graduates were identified by ethnicity. Of those with known ethnicity, 88% were White Non-Hispanic, 9% were Black Non-Hispanic, 1.8% were Hispanic, 0.8% were Asian/ Pacific Island ancestry, 0.25% were American Indian, and 0.2% were Non-Resident Aliens.

The data on Nebraska's Private Career Schools in Appendix E tables can provide a reference for the analysis.

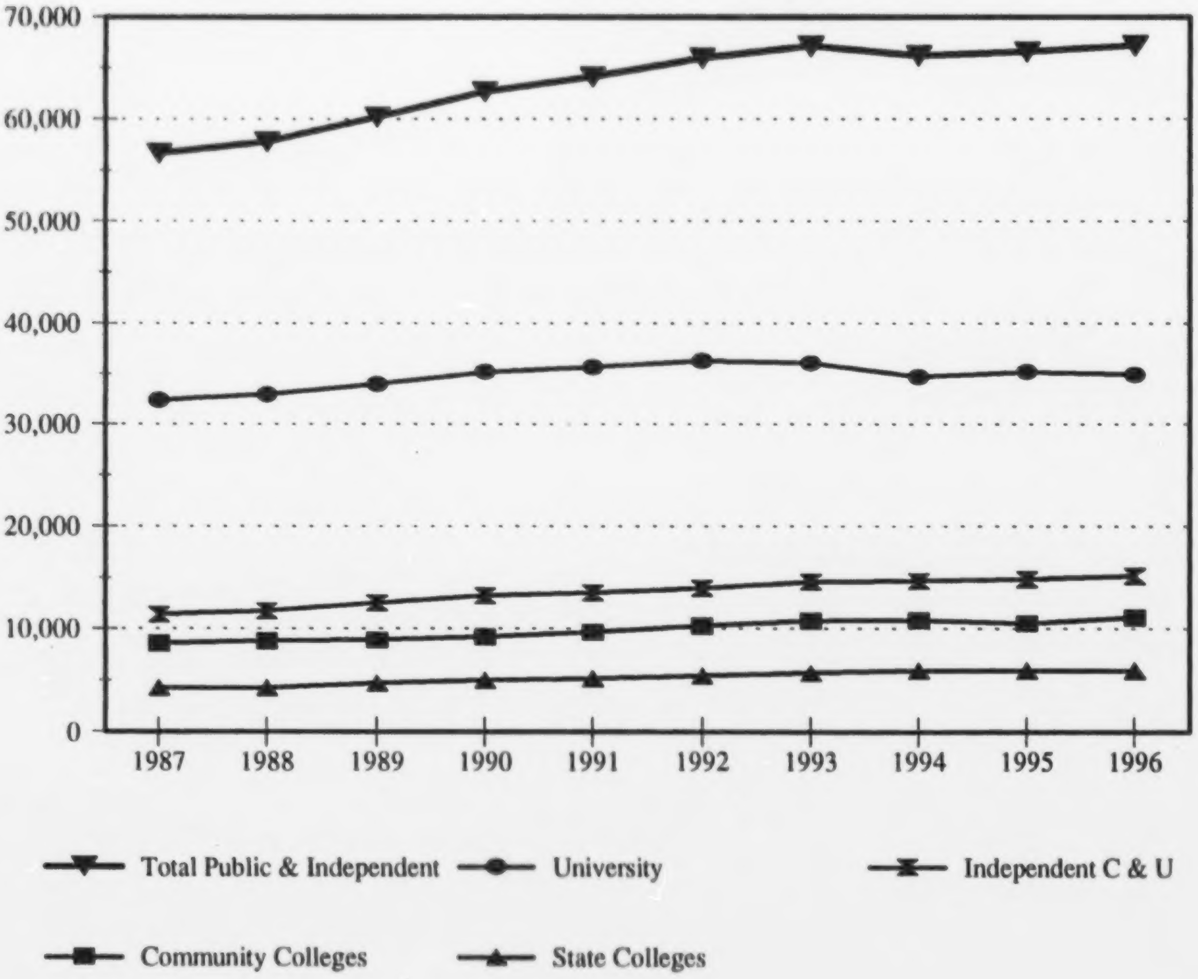
COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

FULL-TIME FALL HEADCOUNT ENROLLMENTS
NEBRASKA PUBLIC AND INDEPENDENT COLLEGES AND UNIVERSITIES



COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Full-time Fall Headcount Enrollment 1987-1996

- Nebraska's Public and Independent Colleges and Universities full-time fall headcount enrollment for postsecondary education increased from 56,657 in 1987 to 67,255 in Fall 1996. This change translates to a 2.1% average annual increase in full-time headcount enrollment. The enrollments reported herein are fall term for each academic year.

- From 1987 to 1993, the Nebraska Public and Independent Colleges and Universities total full-time headcount enrollment had a perceptible annual increase in full-time enrollment. However, in Fall 1996 it was 67,255, essentially unchanged from the Fall 1993 full-time enrollment high of 67,423.

- For 1996, the percentage of full-time students of total headcount enrollment was: University system, 71%; Independent Colleges and Universities, 76%; Community Colleges, 33%; and State Colleges, 70%.

- For 1987, the Nebraska Public postsecondary institutions' full-time headcount enrollment was 79,433. The enrollment increased regularly through 1993, with a peak at 90,504 in 1993. It then dropped to 89,443 in Fall 1994, and increased to 90,902 in 1996. The Public headcount enrollment has been flat since 1992.

- The Fall 1987 full-time enrollment in the University system was 32,359. The University full-time enrollment increased gradually annually through 1992, then decreased slightly in Fall 1993, and has decreased each succeeding year. In 1996, the number was 34,918 full-time University students, a slight increase over the Fall, 1987 full-time enrollment.

- In 1987, the State Colleges (excluding Kearney) enrolled 4,301 full-time students. This enrollment has regularly increased through 1994. Between 1994 and 1996 full-time enrollment has been steady. For Fall 1996, the full-time headcount enrollment at Nebraska's State Colleges was 5,948.

- The Community Colleges increased in full-time headcount enrollment from 8,608 in 1987 to 11,145 in Fall 1996. This increase of 2,537 full-time students translates to an average annual increase of 282 students or 3.3% per year.

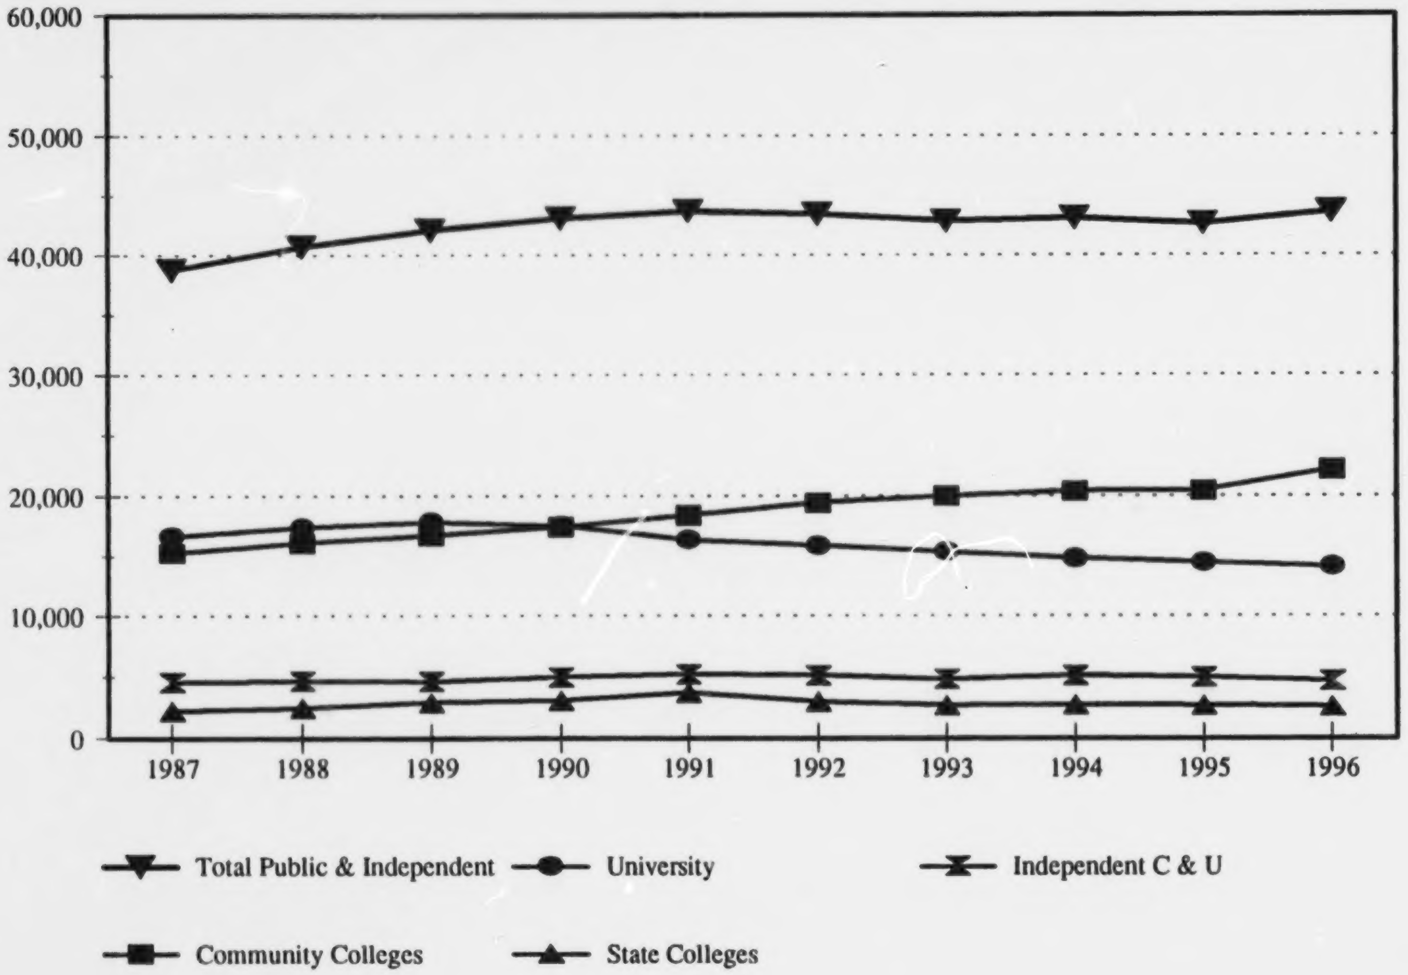
- For Fall 1987, the full-time enrollment for Nebraska's Independent Colleges and Universities was 11,389. Enrollment has increased each year since 1987 to 15,244 in Fall 1996. This change equates to an increase of 3,855 students for a 3.8% average annual increase for Fall 1987 through Fall 1996.

- In summary, the full-time Fall headcount enrollment appears flat for the most recent 5 years, except the University which had a 3.6% decrease between Fall 1992 and Fall 1996.

* The data for this summary appear in Appendix A, Tables A3, A4, and A7.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

PART-TIME FALL HEADCOUNT ENROLLMENTS
NEBRASKA PUBLIC AND INDEPENDENT COLLEGES AND UNIVERSITIES



44

45

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Part-time Fall Headcount Enrollment - 1987-1996

- Nebraska's Public and Independent Colleges and Universities experienced a steady increase in part-time headcount enrollment for 1987 through 1991. From 1991 through 1996, the part-time enrollment remained essentially constant.

- For 1987-1996, Nebraska's public institution's fall term part-time enrollment had the same pattern as total: it increased through 1992, then showed a flat pattern for 1992 through 1996. The 1996 number (38,891) was a 14% increase over the 1987 part-time enrollment of 34,165.

- For Fall 1996, the percentage of part-time to total headcount enrollment at Nebraska's Community Colleges was 20%; at the University system it was 13%; at Independent Colleges and Universities it was 4%; and at the State College system it was 2%.

- The University of Nebraska part-time enrollments increased through 1990, then decreased through Fall 1996. For Fall 1987, the count was 16,648. For the period 1990 through 1996, there was a regular decrease in Fall University part-time enrollment. The 1996 number (14,143) was a 15% decrease below the 1987 part-time enrollment of 16,648.

- The Nebraska State College system's Fall part-time enrollment increased during the years 1987-1991 and then decreased through Fall, 1996. In Fall 1996, it was 2,559, which was 14% above the 1987 number of 2,244.

- From 1987 to 1996, Fall part-time enrollment at Nebraska's Community Colleges increased by 45%. The enrollment pattern was a steady increase. The Fall 1996 Community College part-time headcount enrollment (22,189) was the largest for any of the sectors.

- For Fall 1987, the Nebraska Independent Colleges and Universities part-time enrollment was 4,595. That enrollment increased to 5,236 in Fall 1991. Since 1991, the Nebraska Independent Colleges and Universities appear to be gradually decreasing in part-time Fall headcount enrollment. For the 10-year period of 1987-1996 this part-time fall headcount enrollment has remained relatively unchanged, with a 2% increase.

- Because the IPEDS information does not include full-time equivalent (FTE) enrollment calculations, the next section highlights the full versus part-time mix of the enrollments for the Nebraska public and independent postsecondary institutions. That section also presents FTE enrollments through Fiscal Year (FY) 1995-96. The data are from the Nebraska Education Data System state surveys.

- The continued growth in part-time students at Nebraska's Community Colleges is a prominent characteristic in Nebraska postsecondary enrollments.

* The data for this summary appear in Appendix A, Tables A5, A6, and A7.

TOTAL FALL HEADCOUNT ENROLLMENT
PERCENTAGE FULL-TIME / PART-TIME
STATE OF NEBRASKA
1996

	University	Independent C & U	Community Colleges	State Colleges	Total
Full-time	31%	14%	10%	5.5%	60.5%
Part-time	13%	4%	20%	2.5%	39.5%
Total	44%	18%	30%	8%	100%

Total Fall Headcount Enrollment With Comparisons of Percentage Full-time to Part-time Enrollments - 1996 NEEDS FTE Annual Enrollment and Spring Enrollment for the Public Colleges and Universities[1]

- The 1996 total Fall headcount enrollment for Nebraska Public and Independent Colleges and Universities was 110,876. The comparable enrollments for 1987 and 1991 were 95,417 and 107,824, respectively. For 1991-96, the total Fall enrollment had a 2.8% increase, for an average annual increase of 0.6%.

- In Fall 1996, the public institutions contributed 82% (90,902) of Nebraska's Public and Independent postsecondary enrollment. Within ±1%, this is the same percentage (81-83%) as for 1987 and for 1990.

- The distribution of the total headcount enrollment by sector for Fall 1996 was: University of Nebraska 44%, Community Colleges 30%, Independent Colleges and Universities 18%, State Colleges 8%.

- For Fall 1996, the University of Nebraska sector full-time enrollment comprised 31% and the part-time 13% of this state's total headcount enrollment. Seventy one percent of the University of Nebraska sector enrollment was full-time students.

- Of the Fall 1996, total headcount enrollment, the State College sector full-time headcount enrollment was 5.5%, and the part-time 2.5%. The sector ratio for full-time to part-time enrollment was 70% to 30%.

- The Community College sector full-time headcount enrollment was 10% and the part-time 20% of the Fall 1996 total headcount enrollment. The Community College enrollment was 33% part-time, with only 67% full-time enrolled.

- The Independent sector full-time headcount enrollment comprised 14%, of the total Fall 1996 headcount enrollment, and part-time contributed another 4%. Seventy-six percent of the Independent sector enrollment were full-time students.

- Enrollment in Nebraska's Public and Independent Colleges and Universities continues to be primarily full-time students. For Fall 1996, 60.5% of the students were full-time enrolled. The Community College sector is unique with a larger part-time enrollment (67%), than full-time headcount enrollment (33%).

* The data for this summary appears in Appendix A, Tables A1, A2 and A7.

---

[1] Fall headcount enrollments are from the IPEDS federal survey and include Nebraska's (31) Public and Independent Colleges and Universities. The "Annual" FTE and Spring headcount enrollments are from the NEEDS state survey that includes only the (14) Public Institutions. The NEEDS source (187 survey) defines "Annual" to be fiscal year for the Community College Areas. Academic year is the "Annual" measure for the State Colleges and University institutions.

NEEDS - Spring Term Headcount Enrollment, FY 1995-96 and "Annual" FTE Enrollment, FY 1995-96 for Nebraska's (14) Public Colleges and Universities[1]

TABLE A

Comparison of Fall Headcount (IPEDS) to Spring Headcount (NEEDS) by Sector

Time Period/Enrollment Category	University of Nebraska		Nebraska State Colleges		Community Colleges Areas		Nebraska Public Colleges & Universities	
Fall 1995-96 (IPEDS)	Count	%	Count	%	Count	%	Count	%
Full-time	34,918	71	5,948	70	11,145	33	52,011	57
Part-time	14,143	29	2,559	30	22,189	67	38,891	43
Total	49,061	100	8,507	100	33,334	100	90,902	100
Spring 1995-96 (NEEDS)								
Full-time	31,436	67	5,517	70	9,449	23	46,402	49
Part-time	15,527	33	2,374	30	30,813	77	48,714	51
Total	46,963	100	7,891	100	40,262	100	95,116	100

- An overall comparison of Fall (1995-96) versus Spring (1995-96) headcount enrollment shows an increase from Fall to Spring, with the Total Spring enrollment (95,116) being 105% of the higher Fall term number (90,902). The pattern is not the same for all sectors. The Spring to Fall ratios by sector were: University 96%, State Colleges 93%, Community College Areas 121%. The Community College Area profile is changed from FY 1994-95. There was an increase in full-time for Fall and a large jump in part-time for Spring. (Related events are an increase in part-time for Southeast CC Area at Lincoln with the opening of a downtown education center. Another change is the opening of a new facility for Western Nebraska CC Area at Sidney, Nebraska. It remains to be determined if these factors will alter their campus enrollment patterns.)

- For the State Colleges, the relative percentages of full-time to part-time students were identical for Fall and Spring terms. The University varied somewhat with an increased percentage of part-time for the spring term, relative to Fall. That pattern was observed in FY 1994-95.

---

[1] The Spring survey (I87S) is completed by the institutions in February-March for the current year. The current data are for Spring, 1996. The "Annual" survey (I87A) is completed in August. Table A9 displays that at least one institution had not yet reported their 1996-97 for I87A data, so "Annual" data for 1995-96 were the most current available for this summary.

* The data for this summary appears in Appendix A, Tables A1, A3, A5 and A9.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

TABLE B

Comparison of Annual Headcount (IPEDS & NEEDS) to annual FTE (NEEDS) by Sector

Time Period/Enrollment Category	University of Nebraska		Nebraska State Colleges		Community Colleges Areas		Nebraska Public Colleges & Universities	
Fall 1995-96 Headcount (IPEDS) + Spring 1995-96 Headcount (NEEDS)	Count	%	Count	%	Count	%	Count	%
Total	96,024[1]	52%[2]	16,398	9%	73,596	40%	186,018	100%
"Annual" FTE 1995-96 (NEEDS)								
Total	37,576	39%[3]	7,088	43%	20,757[4]	*	*	*

[2] 52% = (96,024/186,203) x 100 Appendix A, Table A8 contains FTE student numbers.

[3] 39% = (37,576/96,024) x 100

NOTES: [1] The top ½ of TABLE B is a summary of TABLE A which adds together (TABLE A) Fall and Spring "Total" numbers. For example, University of Nebraska total 96,024=49,061+46,963 from TABLE A.

[4] An essential point is that the Community College Areas "Annual" headcount numbers cover the fiscal year (Fall, Spring and Summer terms). Neither NEEDS or IPEDS has a summer enrollment survey, so TABLE B excludes Community College Area headcount versus FTE enrollments. For the Nebraska Community College Areas there is no direct comparison here. The reason for no comparison is that their "Annual" data covers 12 months, while Fall plus Spring is only 9 to 10 months.

- For the University of Nebraska, and Nebraska State Colleges, "Annual FTE students" is calculated as the ratio of academic year headcount to an average hours for a regular student class load. For the University, that ratio was .39 or 39%. This means that 2.6 (1/.39) student class loads equated to one FTE student.

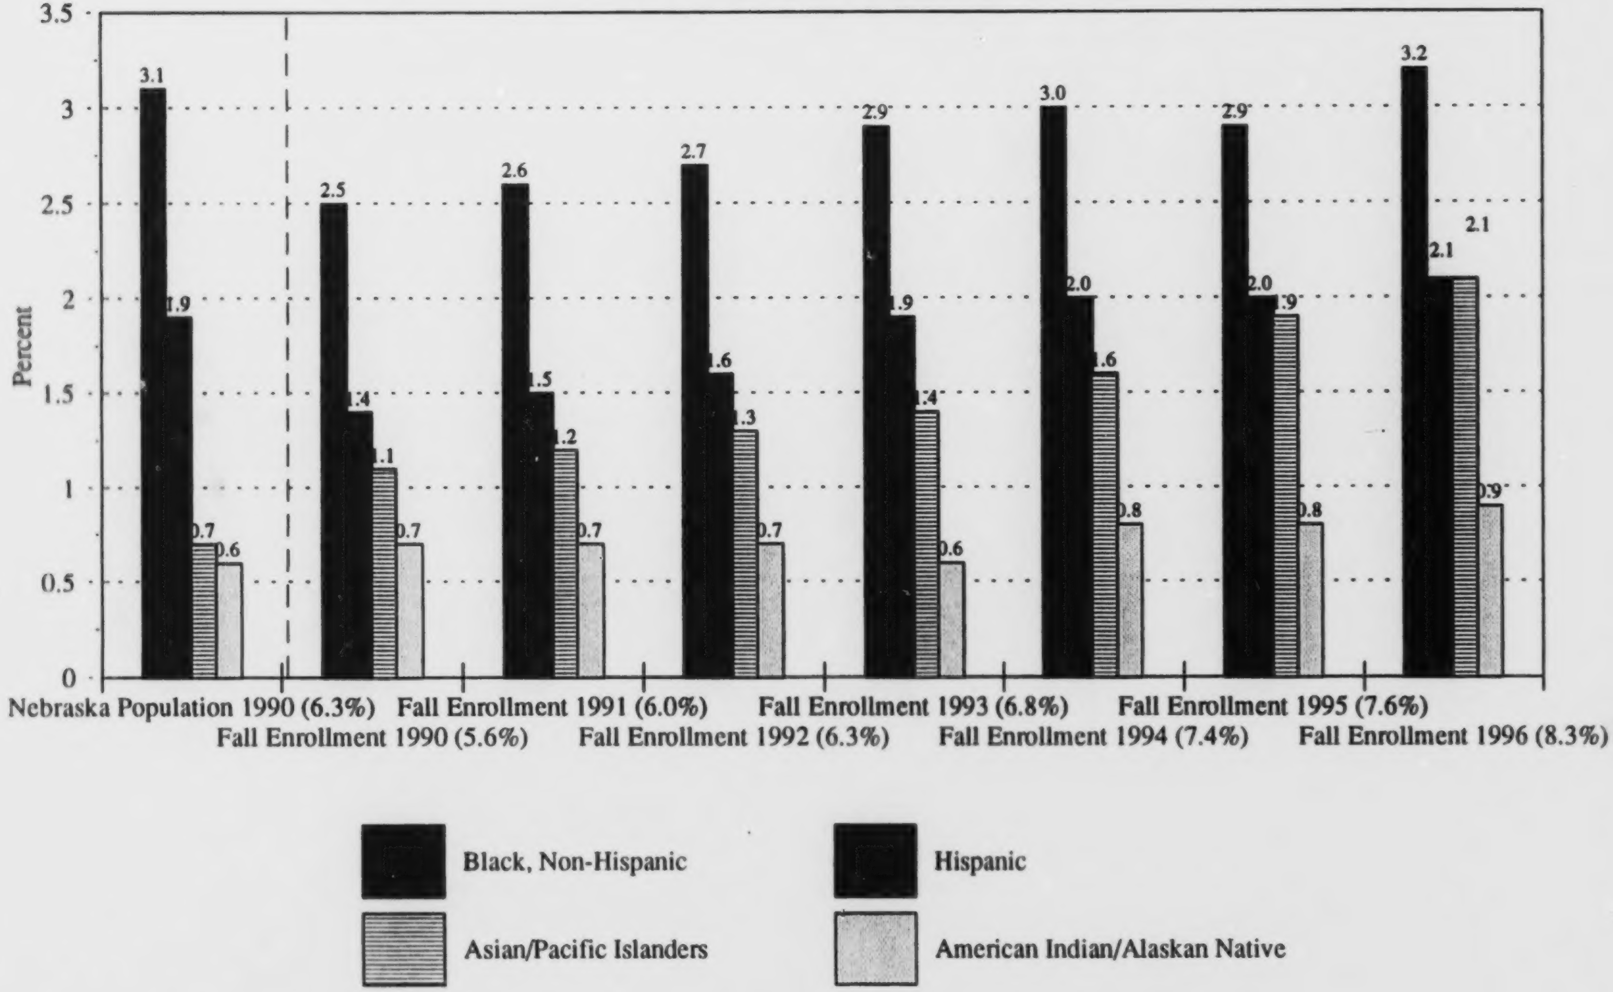
- For the Nebraska State Colleges, .43 was the ratio for the academic year FTE calculation. There, approximately 2.3 (1/.43) student class loads produced 1.0 FTE student. That is, at Nebraska State Colleges 23 students were, on average, completing the course hours expected of 10 students enrolled full-time.

- The University and the Nebraska State College ratios for headcount to FTE students are expected to be different. This relates to their distinct missions, and the different student populations that each serves.

- The "Annual" academic year enrollments for Nebraska's Public Colleges and Universities in 1995-96 was 52% University of Nebraska, 9% Nebraska State Colleges and 40% at Nebraska Community College Areas.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

ENROLLMENT BY RACE/ETHNICITY
COMPARED TO THEIR PROPORTION OF 1990 NEBRASKA POPULATION
NEBRASKA PUBLIC AND INDEPENDENT COLLEGES AND UNIVERSITIES
FALL 1990 TO FALL 1996



COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Enrollment by Race and Ethnicity

Nebraska, United States, and Selected Midwestern States - 1990[2]

- The 1990 headcount enrollment in postsecondary education for Nebraska included 94.4% White Non-Hispanic and 5.6% race/ethnic minority. This excludes Non-Resident Aliens.

- The minority enrollments for Nebraska in 1990 included: 2.5% Black Non-Hispanic, 1.4% Non-Resident Alien, 1.1% Hispanic, 0.7% Asian/Pacific Islander, 0.76% American Indian/Alaskan.

- This 1990 comparison centers on Nebraska and selected neighboring states relative to the total United States. The neighboring states were picked for geographic proximity.

- Considering the total percentage of minority enrollment for the five minority groups described, Nebraska is lower than the U.S. in total percent minority enrollment as well as population. Nebraska had a lower percentage value for minority enrollment for each of the five minority groups compared to the U.S. total.

- Relative to the neighboring states of Colorado, Iowa, Kansas, and Missouri, Nebraska had a middle-lower percentage value for American Indian/Alaskan, Black Non-Hispanic, and Hispanic enrollments. Nebraska had a lower percentage of enrollments in Asian/Pacific Islander and in Non-Resident Alien categories.

SELECTED STATES POSTSECONDARY ENROLLMENTS
BY RACE - ETHNIC GROUPS 1990

State	Total	American Indian	Asian/ Pacific Islander	Black Non-Hispanic	Hispanic	White Non-Hispanic	Non Resident Alien
Colorado	231,547	2,315	5,417	6,943	17,319	194,943	4,610

* with race/ethnicity known

- Minority headcount enrollment is compared against the 1990 Census of population, age 18+. Compared to 6.3% minority persons in the Nebraska population, the Fall 1990 postsecondary enrollment included 5.6% minority persons. In Fall 1996, 8.3% of the Nebraska postsecondary enrollment was race/ethnic minority persons.

- In 1990, the percentage of minorities enrolled reflected under-representation for Black Non-Hispanic and Hispanic persons. The percentage of Asian and Pacific Islanders (1.0%) exceeded the 1990 Census rate (0.7%).

- As the graph on the previous page displays, minority enrollments gradually have moved toward the 1990 population rates. The Fall 1996 rates for Black Non-

---

[1] The 1990 Census data are from the U.S. Bureau of Census Summary Tape Files 1A, STF1A.

[2] Excludes records with race ethnicity unknown. For 1996, this was 3.1% of the total enrollment.

Hispanic (3.2%) and Hispanic (2.1%) are quite close to the 1990 Census rates (3.1% and 1.9%, respectively). The rate of Asian/Pacific Islanders (2.1%) is 3 times the 1990 Census rate (0.7%). The American Indian/Alaskan Native enrollment percentages have grown slowly from 0.7% in 1990 to 0.9% in 1996.

- It is recognized that comparing enrollment rates for 1996 against 1990 Census data assumes fixed population statistics. This is likely a false assumption. However, the 1990 Census is the most current population measure. The essential point remains that the race/ethnic minority persons in Nebraska's postsecondary education appears to be growing.
- In Fall 1996, the percentage of Non-Resident Aliens enrolled in Nebraska's Public and Independent Colleges and Universities was 2.5% of the student population. This percentage continues to increase each year.

Sector Level Race/Ethnicity Summary - 1996

Some statistics can describe the minority composition in the context of total (majority and minority) headcount enrollment for the Nebraska Public and Independent Colleges and Universities. The most prominent race/ethnic minority characteristics for Fall 1996 are described for each sector (calculations exclude categories Non-Resident Alien and Race Unknown):

- The Independent Colleges and Universities of Nebraska have the highest rate of total headcount enrollment that is in a racial or ethnic minority. For Fall 1996, that minority rate was 10.3%. Their minority enrollment rates were Black Non-Hispanic 3.0%, Hispanic 2.1%, American Indian 2.0%, and Asian/Pacific Islanders 3.2%.
- For the University sector, the highest percent of minority enrollment was at the University of Nebraska--Omaha (11.5% for 1996) and the largest number of minority enrollment (10%) was at the University of Nebraska-Lincoln (both measures exclude Non-Resident Alien students). At the University of Nebraska-Lincoln, Non-Resident Alien had the second largest count, following White Non-Hispanic. For 1996, the University's fall headcount enrollment included 7.3% minority students.
- In Fall 1996, the Nebraska State College's headcount enrollment included 5.8% minority students. Of the minorities, only Native Americans, 2.2%, exceeded the 1990 Nebraska census rate, 0.6%. For 1995, Native American's were 0.9% of the Nebraska State College headcount enrollment. Some part of this increase is that all Little Priest Tribal College enrollment was credited to Wayne State College for Fall 1996.
- In 1996, 9.2% of the Nebraska Community College Fall enrollments were from a minority race/ethnic group. All minority percentages exceeded the 1990 Census minority population rates.
- For Fall 1996, the Independent Colleges and Universities at 10.3% and the Nebraska Community Colleges at 9.2%, had the highest percents of minority race/ethnic enrollment.

* The data used for this summary appear in Appendix A, Tables A13 through A15, and from earlier IPEDS surveys for the 1992 and 1994 numbers.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Enrollment Profiles

The data for this summary appears in Appendix A, Tables A16A through A16B. Through this data one can determine what contribution an individual institution (sector) has made to the total enrollment for its sector (the total Nebraska Public and Independent Colleges and Universities). How enrollment changed for an institution (sector) over the past five years, and what the race/ethnic minority enrollment has been is shown for each institution (sector).

Other profiles, not in this report but available are - full-time students, part-time students, men, women, black, non-Hispanic, Hispanic, Asian Pacific, native American, and white, non-Hispanic. Each has reports for the sector level and at the institution level.

Table A16A shows total enrollment at the sector level for the Fall terms 1992 through 1996. "Actual counts" are the Fall term headcounts reported by sector for five years (This repeats a part of Table A1). A "percentage distribution" gives the sector percentage of the Nebraska Public and Independent College and Universities "total students" for each year. For example, consider the University of Nebraska. Its profile shows a steady decrease in its percentage of distribution. From 1992 to 1996, the percentages were 47.6, 46.7, 45.3, 45.5 and 44.2. The data in Table A16A, shows that each sector has had a different profile for 1992-96.

How has the total student enrollment changed for any sector over the past 5 years? An answer comes from viewing the "Index" numbers, by sector (row) in Table A16A. Again, illustrating for the University sector reveals a steady decline in actual count enrollments from Fall 1992 through Fall 1996. The index numbers for the University of Nebraska for 1992-96 were 100, 98.5, 94.9, 95.3 and 94.1, respectively. The base used was the Fall 1992 enrollment (52,112). Then, for example, the Fall 1996 University enrollment (49,061) was down 6% below the base number. So the 1996 index number was 94.

A quick scan of each row of index numbers gives a sense of how enrollment has changed for each sector (or for each institution in Table A16B). The University enrollment has decreased. The Nebraska State College's enrollment dropped, but then climbed in Fall 1994 and 1995 and dropped again in Fall 1996. The Nebraska Community College Area's overall enrollment continued to climb, but leveled off beginning at Fall 1993. It took another jump higher in Fall 1996. The Independent Colleges and Universities's enrollment also continued to increase but the rate (index) is less than for the Nebraska Community College Areas.

The data for this summary appears in Tables A16A,B.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

County or State of Residence Summary for First-time Fall Enrolled Freshmen at Nebraska's Public and Independent Colleges and Universities - Fall 1990, 1992, 1996.

First-time enrolled residence information is reported in even-numbered years, so Fall 1996 was the most recent reporting. Since the CCPE has just completed new programming to track residence over time and by geography, this report includes a tracking of first-time enrolled for the years 1990, 1992, 1994 and 1996. As Tables A17 through A24 show, the tracking will be extended to a 10-year time span, 1990 through year 2000. Using University of Nebraska-Kearney as an example in Table A17, the geography is by state for the 50 U.S. states, including foreign countries. A second display Table A18, is on Nebraska residents. This shows residence by county within Nebraska.

This information is most meaningful at the institution level. These two reports encompass 4 pages per institution. Due to the amount of space required, only one institution per sector is displayed here. UN-Kearney is used to illustrate the information available from these tables. For UN-Kearney:

- The Nebraska (in-state) enrollment was a decreasing percentage of the UN-Kearney first time enrolled freshmen for this period. The percentages of first-time enrolled Nebraska residents for 1990, 1992, 1994 and 1996 were 92.2%, 91.7%, 90.3% and 87.9%, respectively. The percentage of those enrolled as first-time freshmen who were non-Nebraska residents increased for those years.

- Outside of Nebraska, no single state was a predominant provider. The bigger numbers, so the bigger percentages, were from Colorado, Iowa, and foreign countries. The following table displays the counts, and percents. It also displays the magnitude of change for these states over 1990-1996:

Similar reports are available upon request for any of the 31 Nebraska Public and Independent Colleges and Universities.

First-time Enrolled Freshmen Entering UN-Kearney
1990 - 1992 - 1994 - 1996

	Number of Students				Percent			
State of Residence	1990	1992	1994	1996	1990	1992	1994	1996
Colorado	33	30	34	33	2.2	2.2	2.7	2.4
Iowa	12	14	9	15	0.8	0.9	0.7	1.1
Foreign Countries	42	49	39	48	2.8	3.3	3.1	3.5
Other non-Nebraska	21	29	39	69	2.0	1.9	3.2	5.1
Nebraska	1,404	1,356	1,132	1,204	92.2	91.7	90.3	87.9
Total	1,522	1,478	1,253	1,369	100.0	100.0	100.0	100.0

Through Fall 1996, Nebraska residents were a high percent, 87.9% or more, of the UN-Kearney entering first-time freshmen. The percentage who are Nebraska residents has decreased.

Enrollment by County within Nebraska - 1990, 1992, 1994, 1996

- The preceding table displays that Nebraska residents comprised 87.9% or more of the UN-Kearney first-time freshmen enrollment for Fall 1990, 1992, 1994 and 1996.
- UN-Kearney is a state wide University. At least one person enrolled from 84 (90%) or more of Nebraska's 93 counties for 1990, 1992, 1994 and 1996. The counts are widely spread across the 93 counties, with no extreme changes for this period.
- The highest counts are from the counties near UN-Kearney and with larger populations, including Buffalo county where UN-Kearney is located. For 1996, the counties providing the highest counts (percents) were Buffalo 207 (17.2%), Douglas 880 (73%) and Hall 87 (72%) of 1,369 Fall first-time enrolled who were Nebraska residents. See Appendix A, Table A18 for more details on county numbers of first-time enrolled students for UN-Kearney.

The data used for this summary appear in Appendix A, Tables A17 and A18.

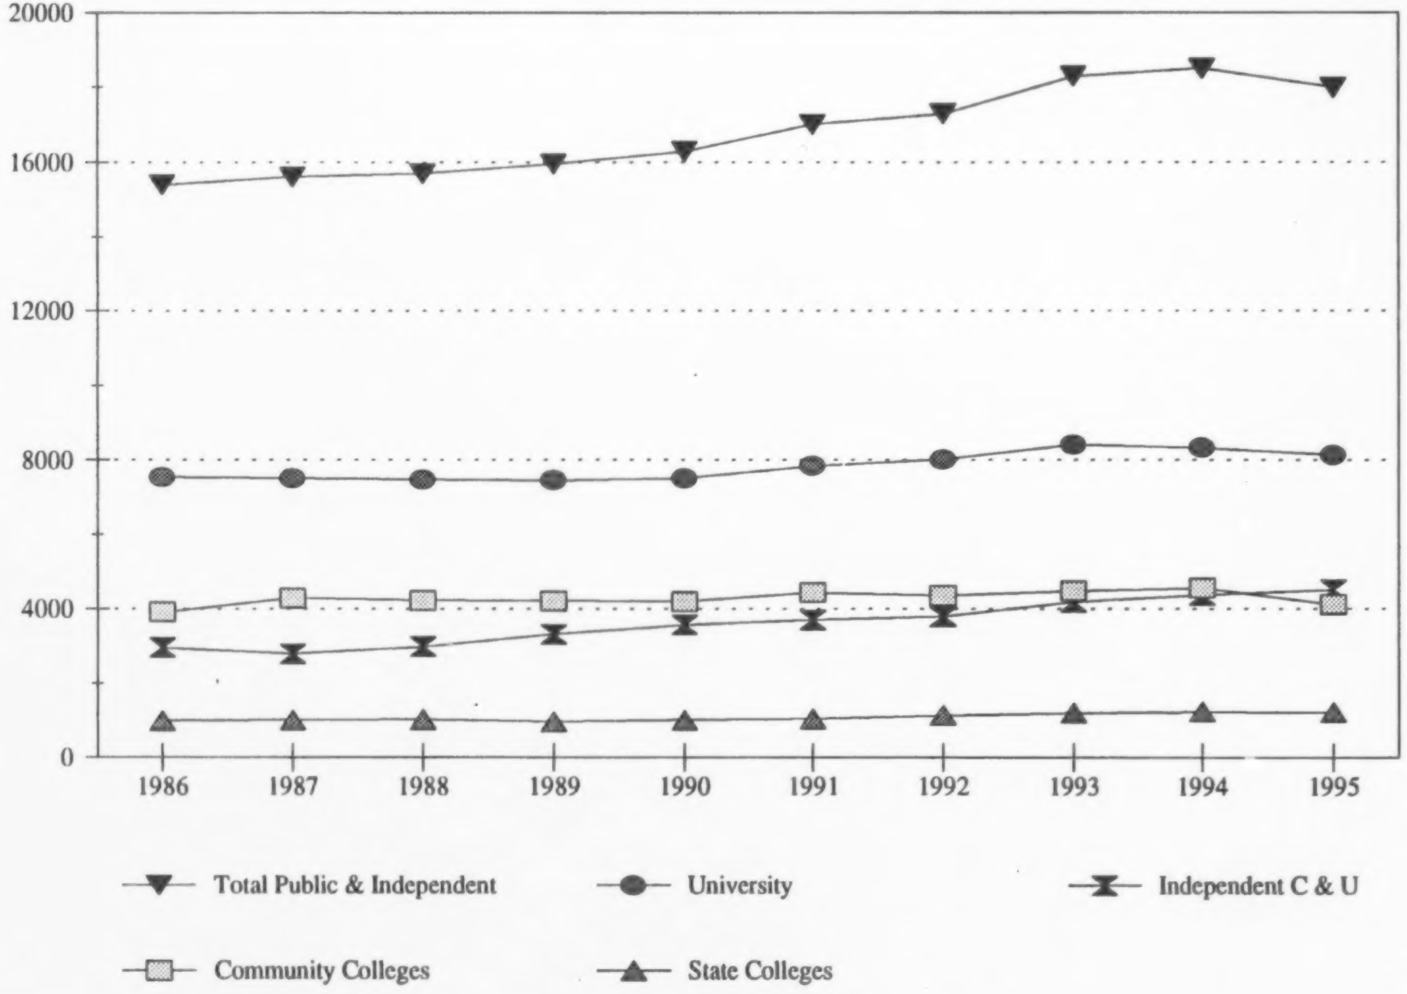
Degrees Awarded

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

NUMBER OF DEGREES AND OTHER FORMAL AWARDS CONFERRED
NEBRASKA PUBLIC AND INDEPENDENT COLLEGES AND UNIVERSITIES
1986-87 THROUGH 1995-96



COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Number of Degrees and Other Formal Awards Conferred 1986-87 through 1995-96

- From 1986-87 through 1995-96, there was an increase from 15,395 completers to 17,991 completers at Nebraska's Public & Independent Colleges and Universities. That change was 16.9% increase. For the same years the increase in fall headcount enrollment was 14.8%.

- The decrease from 18,496 completions in 1994-95 to 17,991 in 1995-96 was the first decrease in ten years in the number of degree completers.

- From 1986-87 to 1995-96, the number of degree completers in the University system increased by 8%, from 7,530 to 8,139. For 1986-87 through 1990-91, the number was nearly constant. It increased through 1993-94, when it peaked at 8,418. Since 1993-94, the University's number of degree completers has decreased by 3%.

- From 1986-87 to 1990-91, the Nebraska Community College's number of completers remained nearly constant. From 1990-91 through 1994-95, the number regularly increased. In 1995-96, it dropped back to the 1990-91 level.

- Nebraska's State Colleges had a steady number of degree completers for 1986-87 through 1991-92. For 1991-92 to 1995-96, the number of completers increased from 1,037 to 1,208, a 16.5% increase.

- The Nebraska Independent Colleges and Universities experienced a regular, ongoing increase in the number of degree completers. The increase was from 2,955 completers in 1986-87 to 4,525 for 1995-96. This is an annual average increase of 5.9%, which totals 53% over ten years.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Number of Degrees and Other Formal Awards Conferred by Degree Level for 1991-92 through 1995-96

- A persistent characteristic of Nebraska postsecondary degrees for 1991-92 through 1995-96 was the consistency (low variability) for the percentage in each degree level:

Percents by Degree Level and Year

Degree Level	1991-92	1992-93	1993-94	1994-95	1995-96
Less than 4 years	28	27	27	27	25
Bachelors	55	55	55	55	55
Masters	11	12	12	13	14
First Prof/Doctoral	6	6	6	6	6

There is a decrease in less than 4 years degrees, with increased numbers receiving masters level degrees.

- From 1991-92 (when Kearney State College became UNK) to 1995-96, the University sector increased its number of degree completers by 2%. The completer numbers were down 1% from the 1993-94 all time high of 8,418. In 1995-96, the University granted 87 (1%) associate/certificate awards, 5,613 (69%) baccalaureate degrees, 1,723 (21%) masters (includes post-masters), 58 (0.7%) first professional, and 658 (8%) doctoral degrees.

- The degrees granted by Nebraska State Colleges are essentially bachelors and masters degrees. The ratio for numbers of bachelors to masters degrees was 6 to 1 in 1991-92; 5.5 to 1 for 1992-93; 6.6 to 1 for 1993-94; 5.5 to 1 for 1994-95; and 6.7 to 1 for 1995-96. The ratio is persistent at 5.5 to 6.5 to 1. For 1995-96, the State Colleges produced 14% of Nebraska's masters degree completers.

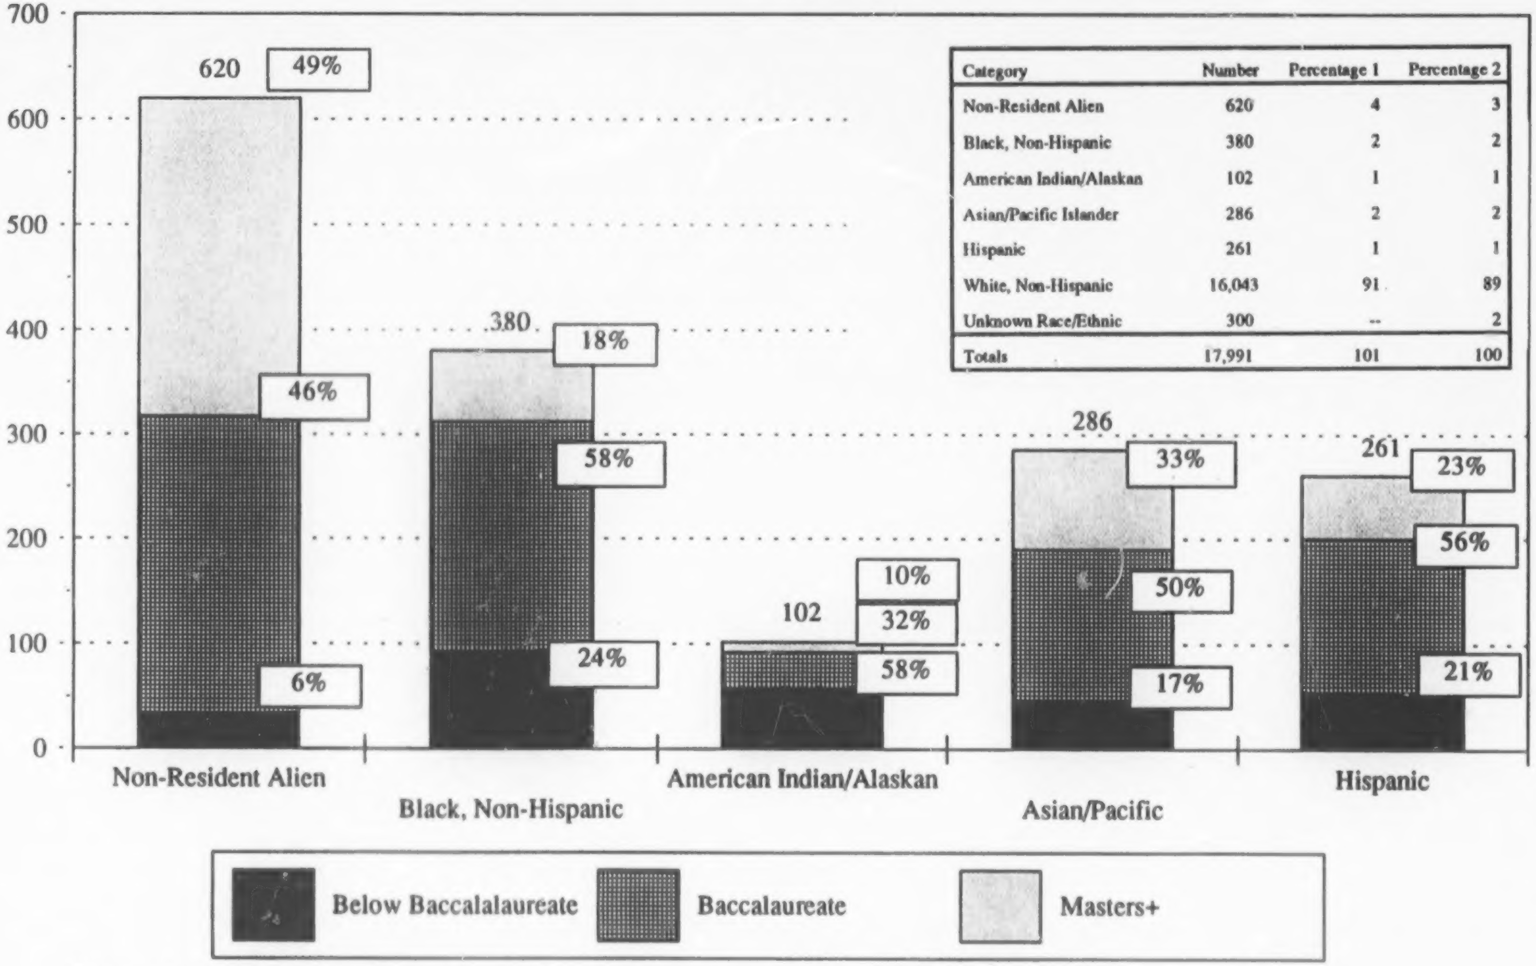
- The number of Nebraska Community College degrees granted was relatively stable: 4,436 in 1991-92; 4,353 in 1992-93; 4,478 in 1993-94, and 4,119 in 1995-96. The Community Colleges serve substantial numbers of students who are interested in specific course work for job related skills, who plan to transfer, and others enrolled in developmental education courses. Many of these do not aspire to a degree or other diploma.

- Nebraska's Independent Colleges and Universities granted 3,786 degrees and certificates in 1991-92, 3,890 in 1992-93, and 4,525 in 1995-96. The number of graduates increased each year with an overall 19.5% increase for these 5 years. For 1995-96, 3,297 (73%) of the degrees granted were from baccalaureate degree programs, 490 (11%) were masters degrees, 453 (10%) were first professional, 276 (6%) were associate/certificate degrees, and 8 (0.5%) were doctoral degrees.

* The data for this summary appear in Appendix B, Tables B1a and B5a.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

NUMBER OF DEGREES AND AWARDS BY CATEGORY OF ETHNICITY
NEBRASKA PUBLIC AND INDEPENDENT COLLEGES AND UNIVERSITIES
1995-96



Category	Number	Percentage 1	Percentage 2
Non-Resident Alien	620	4	3
Black, Non-Hispanic	380	2	2
American Indian/Alaskan	102	1	1
Asian/Pacific Islander	286	2	2
Hispanic	261	1	1
White, Non-Hispanic	16,043	91	89
Unknown Race/Ethnic	300	--	2
Totals	17,991	101	100

Chart excludes White, Non-Hispanic and Unknown Categories. These data are from Table B4.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Number of Degrees and Awards by Category of Ethnicity, Nebraska Public and Independent Colleges and Universities 1995-96

The table on the preceding page displays a count of 300 students with unknown race/ethnicity among 17,992 students granted degrees and awards in Nebraska for 1995-96. The 300 (1.7%) missing count can have minimal effect.

This summary uses the information that is known on race/ethnicity of degree completers.

- Of the 1995-96 completers of degrees and awards with known race/ethnic background, 91% were White Non-Hispanic, 4% were Non-Resident Aliens, 2% were Black Non-Hispanic, 1% were Hispanic, 2% were Asian/Pacific Islander, and 1% were American Indian or Alaskan. Compared to 1993-94, in the percent of degree completers who were Hispanic went from 1% to 2%. The percent of non-resident alien degree completers increased from 3% to 4%.

  Because their profiles are quite distinct, the minority race/ethnic groups are described below individually:

- The Non-Resident Alien group is unique in having 49% of the completers receiving masters and higher level degrees (see Appendix B, Tables B4 for more detail). These were essentially graduate students in attendance at UN-Lincoln and Creighton University. Compared to other race/ethnic minority rates, this is a high rate for post-baccalaureate and higher graduates. Only 6% graduated with under-4-year term degrees.

- Of the Black Non-Hispanic completers, 24% graduated from an under-4-year training program, 58% completed a baccalaureate degree, and 18% received a graduate level degree.

- The American Indian/Alaskan categories are a small count, totaling 102 records, therefore, this category may not have stable percentages from year to year. For 1995-96, the ratio of below baccalaureate, baccalaureate, and masters+ was 58%, 32%, and 10%, respectively. For 1994-95, the percentages were 58%, 27%, and 15%, respectively.

- There were one and one-half times the number of Asian/Pacific Islander completers at the baccalaureate level over the masters+ level 50% and 33% respectively. The remainder (17%) of degrees were below the baccalaureate level. This profile was quite different from 1994-95, which had 2 baccalaureate for every one masters+ degree completer. In comparisons of 1994-95 to 1995-96, at the baccalaureate level, the University increased numbers of Asian/Pacific Islander completers. The Independent Colleges and Universities had a sharp increase in first professional and doctoral program Asian/Pacific Island degree completers.

- The Hispanic category profile is quite like the Black Non-Hispanic profile. The baccalaureate degree was the most common degree level for this group. Bachelor's degrees and lower comprised 77% of the 1995-96 Hispanic degrees, while 23% received graduate level degrees. This profile was very close to that for 1994-95.

- The number of minority race/ethnic degrees is a small percentage (9%) of the Nebraska Public and Independent Colleges and Universities total. It was 9% of the baccalaureate degrees and lower and 8% for masters or higher degrees.

- The Appendix B, Tables B3a-d contain degree completer counts for the individual institutions, by sector and with categories for the standard race/ethnicity descriptions. This new table (in 1996) brings the evaluation to the institution level. The B3 tables are for 1995-96. By request these can be prepared for prior years at the institution level.

* The data for this summary appear in Appendix B, Tables B3a,b,c,d.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Degrees Conferred in Major Program Areas, Nebraska Public And Independent Colleges And Universities 1991-92 Through 1995-96

(Predominant Program Areas and Trends are Defined by Degree Level)

Below Baccalaureate - Certificate and Associate Level

- The most common choices for a below baccalaureate program for 1991-92 through 1995-96 were vocational studies, with 23% to 26% of all associate degrees and certificate awards; and business, with 20% to 25% of that total. Graduates in these two areas annually comprise 42% to 48% of the associate and lower degrees. For 1995-96, vocational studies accounted for 23% and business 19% of the below baccalaureate level completers.

- For this 5-year period, health shows increasing numbers of below baccalaureate degrees. In 1995-96, there were 905 completers, up from 885 completers for 1991-92 but down from a 1993-94 all-time high of 1,012 degrees and awards. Health degrees represented 20% of the total 1995-96 below baccalaureate degrees awarded.

- The 470 Arts and Sciences completers in 1995-96 comprised 10.5% of the below baccalaureate degrees that year. This was down from the 502 Arts and Science completers for 1994-95. There was a nearly flat trend experienced for Arts and Sciences below baccalaureate degrees for 1991-92 through 1995-96.

- The physical sciences and engineering has experienced a steady increase in the number of degree completers at the below baccalaureate level for 1991-92 through 1995-96. This area accounted for 8% of the 1991-92 below baccalaureate awards. For 1995-96 it was 10.5%.

- For 1995-96, the life sciences, social sciences, humanities, law and education disciplines each had under 5% of the number of associate and lower degrees granted.

Baccalaureate Level

- Business consistently registers the largest number of graduates for Nebraska baccalaureate degrees. For 1991-92 through 1994-95, the percentage was stable for business, ranging from 25% to 27% of all baccalaureate degrees. For 1995-96, business majors accounted for 25% of Nebraska's baccalaureate degrees.

- From 1991-92 through 1995-96, the social sciences regularly increased in number and percentage of baccalaureate completers. For 1991-92, the number of social science bachelors degrees was 1,592. The count was 1,680 for 1993-94 and increased to 1,738 for 1995-96. The social sciences regularly provide about 17% of Nebraska's baccalaureate degrees.

- Education displays a increasing trend for 1991-92 through 1994-95, including 16% to 14.6% of Nebraska's baccalaureate degrees. For 1995-96, its 1,391 completers were 14.1% of the state total.

- At the baccalaureate level, humanities, health, life sciences and physical science/engineering areas continue to have increased numbers of completers. For

1995-96, the humanities had 12%; health 10%; life sciences 8%; and physical science/engineering 7.7% of baccalaureate graduates. Baccalaureate health and life sciences programs continue to produce increasing numbers of graduates.

- Arts and sciences, vocational and law disciplines each annually have less than 2.5% of the graduates with baccalaureate degrees.

* The data for this summary are from Appendix B, Table B5.

Beyond Baccalaureate: Post-Baccalaureate, Masters, Post-Masters, First-Professional, Doctorate

- For 1991-92 through 1995-96, the percentage of beyond baccalaureate degrees conferred in education was 27% to 29% of the total. For 1995-96, education had 1,028 beyond baccalaureate degrees, which accounted for 29% of the total. The trend is more beyond baccalaureate degrees in education.

- Health majors provide more beyond baccalaureate degrees each year. For 1995-96, the number was 764. Health graduate-level degrees are primarily at the first-professional level. In 1995-96, first professional degrees in medicine, dentistry and pharmacy accounted for 66% of the beyond baccalaureate health degrees.

- From 1991-92 through 1995-96, business remained a distant third in the number of beyond baccalaureate degrees granted with an annual rate of 350 to 450 graduates. For 1995-96, there were 444 degrees in business, representing 12% of the beyond baccalaureate total.

- The social sciences area has also had a steadily increasing number of beyond baccalaureate degrees conferred. The 343 social sciences beyond baccalaureate degrees granted in 1995-96 represented 9.5% of all beyond baccalaureate degrees granted in Nebraska postsecondary education.

- Post-baccalaureate degrees remain few, about 25 to 30 each year. These are in health and humanities.

- Masters degrees are mostly in education (917), and business (429). These two areas accounted for 57% of the masters degrees in 1991-92 and 57% in 1995-96. Social science (306), engineering and physical science (214), and health (187) granted the next highest numbers in 1995-96.

- Post-masters degrees continue to be granted in education at a rate of 30 to 40 per year. For 1995-96, the number was 34. Health had 41 post-masters graduates in 1995-96. This was a large increase over 1991-92 through 1994-95 wherein a total of 7 post-masters degrees were granted. The increase was post-masters in nursing at UNMC (33) and at Clarkson College (8).

- The numbers of first-professional degrees conferred in 1995-96 shows very little variation from the 4 prior years. For 1995-96, the percentages of the total first-professional degrees were: law-39%, medicine-28%, pharmacy-18%, dentistry-15%.

- For 1995-96, doctoral degrees percentages were: education-27%, life sciences-24%, engineering and physical sciences-15%, humanities-9%, social sciences-13%, business-5%, health-5%, and general arts and sciences-1%. The percentages are quite similar to 1994-95 rates.

* The data for this summary appear in Appendix B, Table B5. First professional degree percents use numbers taken directly from the IPEDS Completions surveys.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Profile of Revenue for Nebraska's Public Postsecondary Institutions 1990 - 91 Through 1995 - 96

Since hospital revenues are recognized as being a large revenue source for Nebraska public postsecondary education relative to the 1993-94 U.S. norm, the University Hospital and auxiliary enterprises were held out of this revenue profile to evaluate the balance of revenue sources relative to the similarly qualified U.S. norm. The percentages shown below are for major revenue sources **using the most current available United States IPEDS data for 1993-94, and excluding hospitals and auxiliary enterprises revenue**

		Appropriations		Tuition/	Federal	Private	
	Year	State	Local	Fees	Grants/Contract	Gifts/Grants	Other
U.S.[1]	1993-94	45.1%	4.5%	23.2%	13.9%	5.0%	8.3%
Nebraska[2]	1993-94	46.1%	6.2%	18.1%	13.8%	6.9%	8.9%
Nebraska	1995-96	45.8%	6.4%	18.4%	14.1%	6.4%	8.9%

This table displays that when hospital and auxiliary services revenue are excluded, the percentages for major revenue sources for Nebraska's public postsecondary institutions are similar to the U.S. norms. For 1993-94, differences include a substantially lower Nebraska percentage of total revenues for tuition and fees, and higher percentages for local appropriations and for federal and private gifts and grants. For 1995-96, local appropriations federal grants/contracts percents were higher relative to 1993-94.

The graphic on the preceding page displays the percentage of revenues for the categories of state appropriations, hospitals, tuition and fees, auxiliary enterprises, federal grants and contracts, private gifts and grants, local appropriations, and other. Some comparatives to the U.S. norm can help to describe a profile of revenue for Nebraska's public postsecondary institutions:

- State appropriations were a decreasing percentage of total revenues for 1990-91 to 1995-96. Nebraska's state appropriation percentage of total revenues decreased from 35.5% in 1990-91 to 33.0% for 1993-94, then to 31.6% for 1995-96. For 1993-94, the percentage of revenue from state appropriation remained lower than the national norm. NOTE: Table C-5 displays that for each year 1991-92 through 1995-96, the state appropriation of dollars has increased going from $330 million (index 100) to $378.5 million for 1995-96 (index 115, up 15%). The decreasing percentages in Table C-5 reflect that revenue dollars have increased at a more rapid pace for some other revenue sources. In Table C-5 the comparable indexes of increase are for auxiliary enterprises 137, and for hospitals 133.

The U.S. data are from *The Digest of Education Statistics (IPEDS)*, October 1996. U.S. Department of Education, Table 322. 1993-94 was the most recent year for which a national summary was published.

The Nebraska public postsecondary institutions 1993-94 and 1994-95 data appear in Appendix C, Table C5.

- The 1990-91 Nebraska percent of revenue from hospitals was quite above the national norm. The U.S. rate was 10.3% while Nebraska's public institutions had 17.5% of total revenues from the University Hospital. For 1993-94, the Nebraska rate increased to 18.2% while the U.S. norm rose only to 10.8%. In 1995-96, that rate reached 20.1%. Table C5 displays that the Nebraska revenue for hospitals is regularly balanced by a near equal dollar expenditure for hospitals.

- Tuition and fees are an increasing percentage of U.S. public institutions' revenues. The Nebraska public postsecondary institutions' percentage for tuition/fees is increasing, but the rate of increase appears slower than the national norm. Nebraska's actual dollars of revenues from tuition and fees ($52.3 million) were up 40% for 1995-96 over 1990-91 tuitional fees revenues ($108.4 million). This is an average annual increase of 8% for 1990-91 to 1995-96.

- Nebraska's public college and university federal grant and contract dollars were up an average of 3.6% annually for 1990-91 through 1995-96. In 1990-91, this source as a percent of total Nebraska revenues was below the national norm. In 1993-94, Nebraska increased to 9.8%, near the federal percentage which was 11.0%. The Nebraska rate for 1995-96 was 9.7% of the total revenues. This is a 15% increase from the 1993-94 dollar amount.

- For this same time period, private gifts and grants dollars increased by $12.7 million, for an average annual increase of 7.9%. This source remained level, near 4.9% of Nebraska public postsecondary institution revenue through 1994-95, then dropped to 4.4% for FY1995-96. The Nebraska percentage remained above the national norm through 1993-94.

- Through 1993-94, Nebraska's percentage of revenue from local appropriations has remained slightly higher than the federal percentage. For 1990-91, it was 4.1% of total revenue and is constant at 4.4% for FY1993-94 and FY1995-96.

- Compared to a U.S. profile of revenue, the single dominant Nebraska characteristic is the relative lower percentage of total revenues provided by tuition and fees in public postsecondary education. Nebraska's hospital revenue remained higher than the U.S. norm, and each year it continues to take an even higher percentage. However, Nebraska's hospital revenue dollars remain matched by hospital expenditures for 1990-91 through 1995-96.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

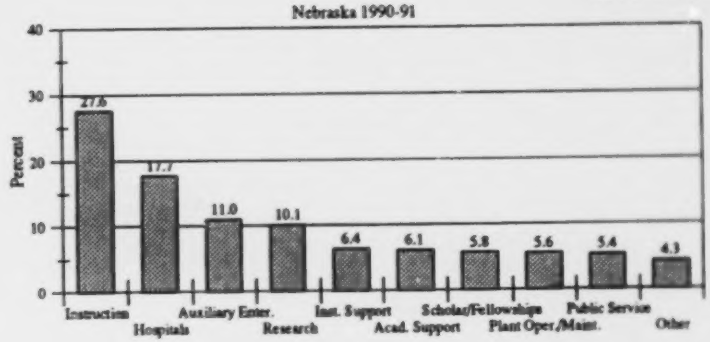
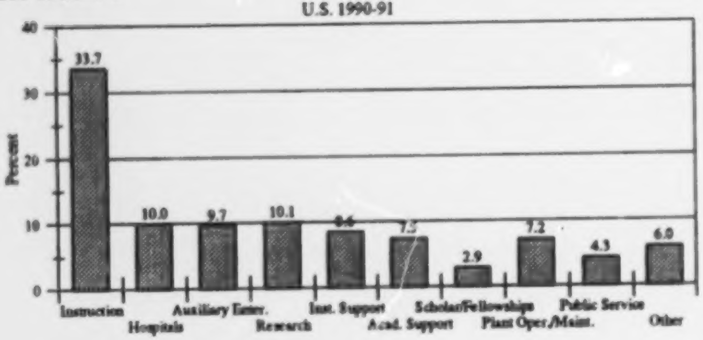
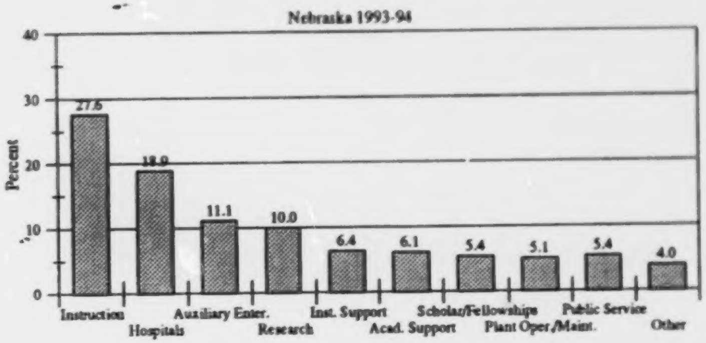
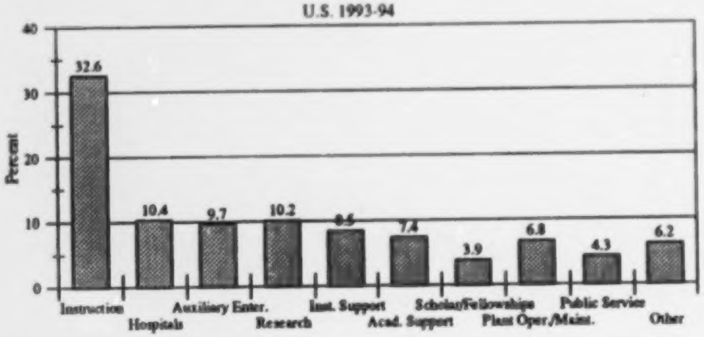
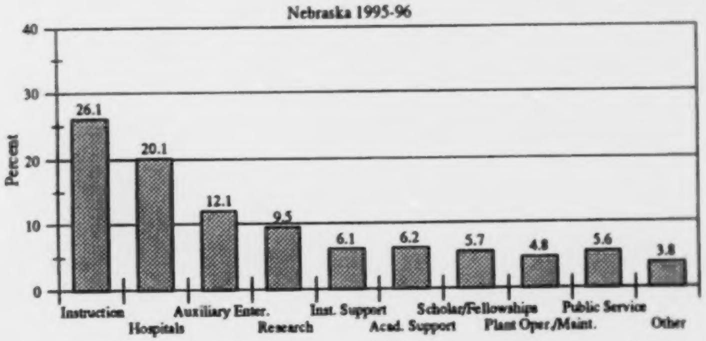
PROFILE OF EXPENDITURES
NEBRASKA PUBLIC INSTITUTIONS
1990-91 THROUGH 1995-96











The United States Data are IPEDS data from The Digest of Education Statistics, published by the U.S. Department of Education 1996. The Nebraska data are from prior IPEDS Finance surveys for fiscal years 1990-91, 1993-94.The data for 1995-96 appear in Table C5.

Hospital expenditures are recognized as a large expenditure source for Nebraska public postsecondary education relative to the U.S. norm, so the University Hospital and auxiliary enterprises were held out to evaluate the balance of expenditures relative to the similarly qualified U.S. norm. The percentages are for major expenditure sources **excluding hospital and auxiliary enterprises expenditures and using the most current published IPEDS national data, which are for 1993-94:**

	Year	Instruction	Research	Institutional Support	Academic Support	Public Service	Student Services	Scholarship/ Fellowships	Plant Operation & Maint.	Other
U.S.[3]	1993-94	40.8%	12.8%	10.7%	9.2%	5.4%	6.1%	4.8%	8.5%	1.7%
Nebraska[4]	1993-94	39.3%	14.3%	9.2%	8.7%	7.7%	4.1%	7.8%	7.3%	1.6%
Nebraska	1995-96	38.6%	14.1%	9.0%	9.1%	8.6%	4.4%	8.4%	7.1%	0.7%

This table displays that in 1993-94, with hospital and auxiliary services expenditures excluded, the percentages for major expenditure sources for Nebraska's public postsecondary institutions were generally comparable to the U.S. norm. Notable exceptions were for public service, research, and scholarships/fellowships wherein Nebraska's percentage rates were higher; and for instruction, institutional support and student services for which percentages were lower than the national norm. Compared to 1993-94, the 1995-96 percentages increased for scholarships/fellowships and public services. Else remained nearly unchanged.

The graphic on the preceding page displays the percentage of total expenditures for the categories of instruction, the University Hospital, auxiliary enterprises, research, institutional support, academic support, student scholarships and fellowships, plant operation and maintenance, public service, and other. Some comparatives to the U.S. norm can help to describe a profile of expenditures for Nebraska's public postsecondary institutions.

- The data table on page 31 (or Appendix C, Table C5) displays a modest decrease in the percentage of Nebraska postsecondary education total expenditures used for instruction. From 1990-91 to 1995-96, the decrease was from 27.6% to 26.1%.
- Relative to the U.S. norm for 1990-91, Nebraska's public postsecondary institutions were using a slightly lower percent of expenditures for instruction. The U.S. norm for 1990-91 was 33.7% for instruction, while Nebraska's was 27.6%. In 1993-94, the U.S. rate decreased to 32.6%, while Nebraska's public institutions rate was unchanged at 27.6% of expenditures for instruction. The U.S. and Nebraska patterns are of slowly decreasing percentages of total expenditures given to instruction.
- For 1990-91, the University Hospital percentage of expenditures (17.7%) were quite above the national norm for hospitals (10.0%). For 1993-94, this figure

---

[3] The U.S. data are from *The Digest of Education Statistics (IPEDS)*, October 1996. U.S. Department of Education, Table 335.

[4] The Nebraska public and postsecondary institutions 1993-94 and 1995-96 data appear in Appendix C, Table C5 and on page C-6.

rose to 18.9% of Nebraska's public postsecondary expenditures, compared to 10.4% for the national norm. For 1995-96, Nebraska's figure increased to 20.1% of expenditures for the University Hospital.

- Auxiliary enterprises remain a slightly higher part of the total expenditure for Nebraska compared to the U.S. norm. The comparative of percentages for 1993-94 shows the U.S. norm at - 9.7%, and Nebraska at - 11.1%. The 1995-96 percentage for Nebraska increased to 12.1%.

- For Nebraska, research expenditures as a percentage of total are increasing. For 1993-94, Nebraska's percentage of 10.0% for research was comparable to the U.S. percent of expenditures for research of 10.1%. For 1995-96, Nebraska's expenditure percentage decreased to 9.5%.

- For 1990-91 and 1993-94, Nebraska was above the U.S. norm in the percentage of expenditures used for scholarships and fellowships. The U.S. norm changed from 2.9% to 3.9%, whereas Nebraska's public institutions regularly spent around 5.5% of their budget on scholarships/fellowships. The 1993-94 rate for Nebraska's public institutions (5.7%) was essentially unchanged.

- Nebraska public institution plant operation and maintenance expenditures have received a lower percentage of the budget for years 1990-91 through 1995-96. The percentage was 5.6% in 1990-91; 5.1% in 1993-94; and 4.8% for 1995-96.

The United States Data are IPEDS data from The Digest of Education Statistics, published by the U.S. Department of Education 1996. The Nebraska data are from IPEDS Finance surveys for prior fiscal years 1990-91, 1993-94, and appear for 1995-96 in Table C23. See Table C28 for an explanation of Hospitals/Educational Activities/Other category.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Profile of Revenue for Nebraska's Independent Colleges and Universities 1990-1991 Through 1995-1996[2]

Although hospital revenues and expenditures are a significant budget factor for Nebraska's public postsecondary institutions, Nebraska's Independent Colleges and Universities do not operate any hospitals.[3] Therefore, for this sector no adjustment is required for hospitals and none is made for auxiliary enterprises.

The graphics on the preceding page display the percentage of revenues for the categories of tuition and fees, auxiliary enterprises, private gifts and grants, federal grants and contracts, and other. "Other" includes sales and services of education activities, hospital related, and more. This and the data on the next page are the basis for the following summaries.

- Tuition and fees remains the largest source of revenues for Nebraska's Independent Colleges and Universities.

- For Nebraska institutions, the percentage of total revenue coming from tuition and fees dollars has increased from 42.8% in 1990-91 to 48.5% for 1995-96. For 1993-94, this source was 46.3% of total revenue for Nebraska's Independent Colleges and Universities, compared to a slightly lower 42.0% for the U.S. private colleges and universities.

- From 1990-91 through 1995-96, the auxiliary enterprises provided over 9% of the Nebraska Independent Colleges and Universities annual revenue.

- Dollars in private gifts decreased from 11.1% to 9.7% for 1990-91 through 1995-96. Since the dollars from this revenue source are fairly static, this resulted in a decreased percentage of total revenues.

- Relative to the U.S. norm for private colleges, Nebraska's Independent Colleges and Universities receive a substantially lower percentage of revenues from the federal government in grants and contracts. For 1990-91, the U.S. norm was 15.4%; the Nebraska rate was 6.0%. For 1993-94, the U.S. rate was 14.5%. Meanwhile, the Nebraska rate was unchanged at 5.9% for 1993-94 and was lower, 4.9%, for 1995-96.

- It is not clear for Nebraska's Independent Colleges & Universities what revenues are associated with hospitals. This is unfortunate because hospitals and health are a substantial part of the economy. See Table C23 for some data and more details.

- Of its revenue sources, student tuition and fees provide the highest percentage of the Nebraska Independent Colleges and Universities total revenue. This was 48.5% in 1995-96. Similarly, U.S. private colleges and universities acquired about 42% of revenues from tuition and fees (1993 figures, the most recent available). The rate is increasing both for Nebraska and the U.S.

---

[2] The U.S. data are from *The Digest of Education Statistics* (IPEDS), October 1996, U.S. Department of Education, Table 323. 1993-94 was the most recent year for which a national summary was published.

[3] The Nebraska data used for this summary are from Table C23. See a note there for clarification of data that relate to Creighton University's operation of its medical school.

*See Tables C23 and C28 for an explanation..

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Profile of Expenditures for Nebraska's Independent Colleges and Universities 1990-1991 Through 1995-1996

The following summaries relate to the graphics on the preceding page and to the data on page 37, taken from Table C23. The graphic displays the percentage of total expenditures for instruction, institutional support, student scholarships and fellowships, auxiliary enterprises, academic support, student services, plant operation and maintenance, and other at Nebraska's Independent Colleges and Universities. Comparisons to the U.S. norm for private colleges and universities can help describe the expenditures for Nebraska's institutions.

- The 1990-91 U.S. profile shows, on average, 26.6% of private institution expenditures going to instruction. Nebraska's Independent Colleges and Universities spent a significantly higher percentage, 42.6%. Annually, 40% to 43% of their total budget is for instruction.

- Financial support in scholarships and fellowships at Independent Colleges and Universities was 12.8% in Nebraska versus 9.2% for the United States in 1990-91. That rate for the Nebraska Independent Colleges and Universities expenditure is increasing; it was 14.0% for 1993-94, then 14.2% for 1995-96. The U.S. rate increased from 9.2% to 11.0% for 1990-91 through 1993-94.

- From 1990-91 through 1993-94, the percentage of expenditures for institutional support at Nebraska Independent Colleges and Universities slowly decreased but remained slightly higher than the U.S. rate. Nebraska's percentage was 11.5% of the 1995-96 expenditures, up from 11.3% for 1993-94.

- Research expenditures is an area where Nebraska Independent Colleges and Universities were quite below the national norm.[4] For 1993-94, the national norm for private college research was 7.8% of annual expenditures. The comparable percentage for the Nebraska Independent Colleges and Universities for 1993-94 was below 3%. The Nebraska rate remained below 3% for 1995-96.

- For 1990-91 and 1993-94, the Nebraska independent postsecondary institutions were below the national percentage for plant operation expenditures.

- Prior to 1994-95, only Union College of the Nebraska Independent Colleges and Universities reported expenditures for independent operations. For 1995-96, there were zero dollars reported as expenditures for independent operations by the Nebraska Independent Colleges and Universities.

- Nebraska's Independent Colleges and Universities are putting a substantial percentage of their budget dollars into instruction. The supporting data on the preceding page display steady increases for 1990-91 versus 1995-96 in actual dollars funded for instruction. Dollars for instruction were up an average annual 6.4%. Funding for academic support increased by an average of 12.5% per year.

123

Number of Full-time Instructional Faculty by Rank, Nebraska Public and Independent Colleges and Universities 1987-1996

The data plots on the preceding page display the number of full-time instructional faculty by rank for the ten-year period of 1987 through 1996. A section is shaded to show the patterns of decreasing numbers for the instructor rank, and concurrently the increase in numbers of no academic rank full-time instructional faculty. Other summary is given in the following:

- From 1987 through 1996, the total number of postsecondary full-time instructional faculty at Nebraska's Public and Independent Colleges and Universities increased from 3,405 to 4,072. This is a 2.2% average annual increase. In the span of 1987 to 1996, the ratio of total headcount enrollment divided by the total number of full-time faculty was reduced from 28.0:1 to 27.2:1 to 1.

- The most obvious change in numbers of full-time faculty by rank is the decrease in the number of instructors and the increase in no rank assigned full-time faculty. This relates to a redefinition of titles by some of the Nebraska Community College Areas.

- In 1987, individuals with no assigned academic rank accounted for 5.8% of the total full-time instructional faculty. In 1996, the no assigned rank group had increased to 16.8% of the total. In this same time, the numbers of instructors decreased from 714 to 277, that is from 21% to 6.8% of the total count. There is a clear movement of Nebraska's Community Colleges from assigning full-time faculty as instructors to designating full-time instructional faculty positions with no assigned academic rank. This change is viewed in the data on the following page.

- The assistant professor count steadily increased from 1987 to 1993. Since 1993, the number has slowly decreased. This group shows a 26% increase in count for 1987 through 1996.

- From 1987 through 1996, there continued to be a slight annual increase in the number of professors and associate professors. In 1987, there were fewer associate professors (753) than professors (930). In 1996, the difference in numbers was much less; 1,005 associate professors, 1,041 professors, and continues to narrow.

- Of the 1989 full-time faculty, 26% were professors and 22% were associate professors. In 1996, the rates were 25.5% and 24.7%. The associate professor numbers are increasing faster than professors.

NOTE: The lecturer rank is excluded from the graphics and this discussion because the counts were such small numbers. These counts ranged from 9 to 49.

* The data for this summary are from Appendix D, Table D3 for 1996, and like data from IPEDS surveys for 1987 through 1995. The data are displayed on the following page.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

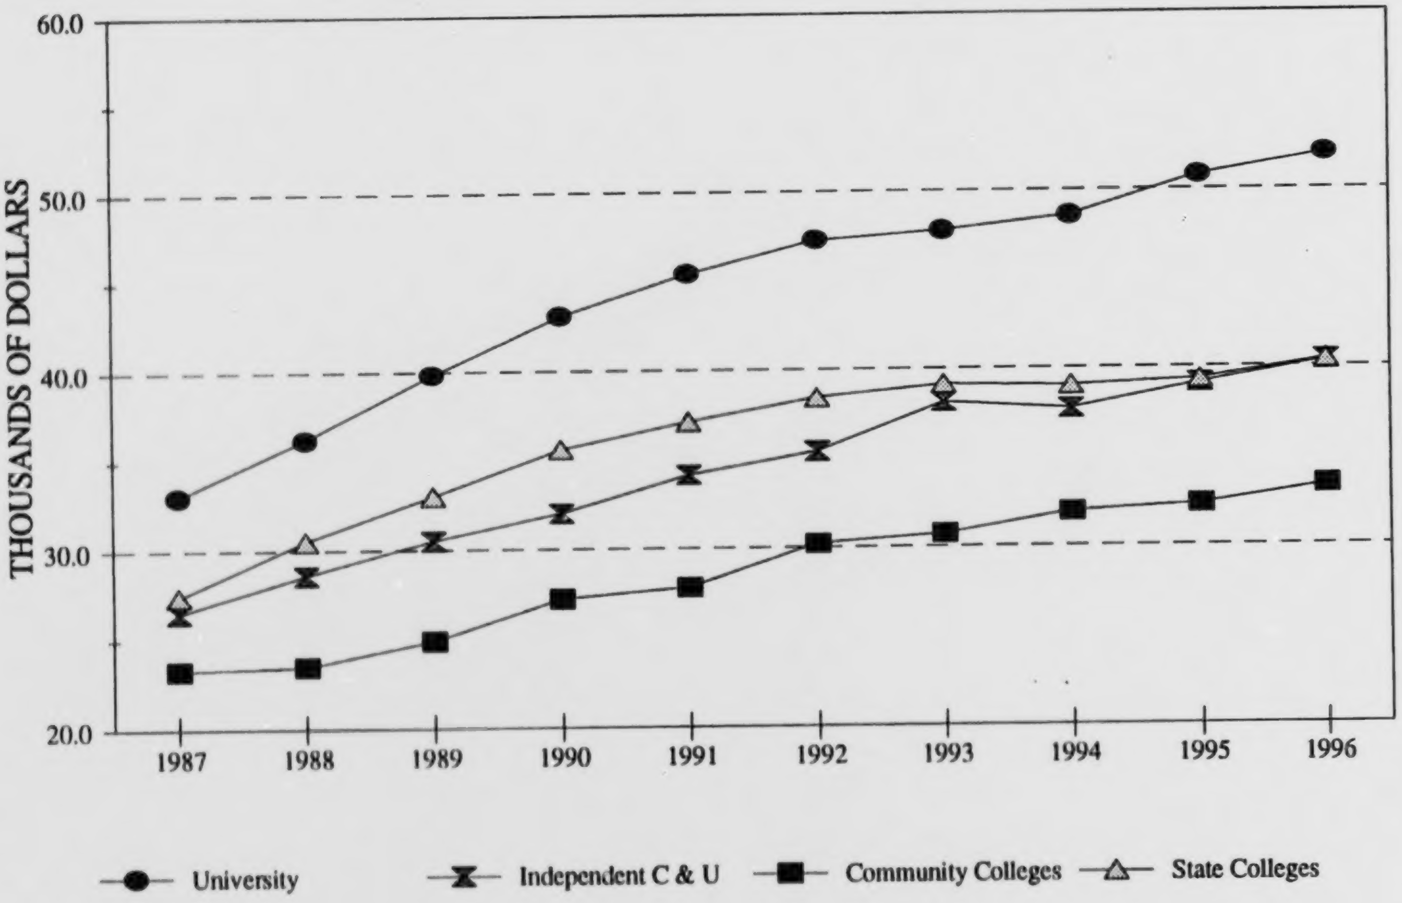
A TEN YEAR SUMMARY OF AVERAGE SALARIES OF FULL-TIME INSTRUCTIONAL FACULTY BY YEAR AND FOR INSTITUTIONAL SECTORS NEBRASKA PUBLIC AND INDEPEDENT COLLEGES AND UNIVERSITIES



A Ten Year Summary of the Number and Average Salaries of Full-Time Instructional Faculty by Year for Institutional Sectors

- From 1987 through 1996, the University of Nebraska percentage of full-time instructional faculty ranged from 53.5% (1987 and 1988) to 49.9% (1996) of the total number for all sectors. For this time period, the University of Nebraska average salary increased by $19,000. This was a 57.5% increase, the largest increase for any of the sectors.

- The Nebraska State Colleges and Nebraska Independent Colleges & Universities average salaries for full-time instructional faculty remained close throughout 1987 to 1996. The State College average increased by about $13,000, which was a 47.6% increase. For the same time, the Independent Colleges & Universities average faculty salary increased 52.4%. In 1996, their averages were essentially equal at $40,400.

- For the Nebraska Community College areas average salaries were lower relative to the other sectors. For 1987, this average income was $23,316, while for 1996 the average was $33,369. This was a 43% increase in actual dollars.

Note: The data plots on the previous page were developed from the ten year summary of full-time instructional faculty headcount numbers and average salaries that appear in Table D1. The University of Nebraska accounts for over 50% of the total full-time instructional faculty count. Because this is a high percentage of total, the Nebraska Public and Independent Colleges and Universities changes in full-time faculty counts and average salaries are dominated by the University sector. Therefore, the graphic does not display a total and the summary is for the individual sectors.

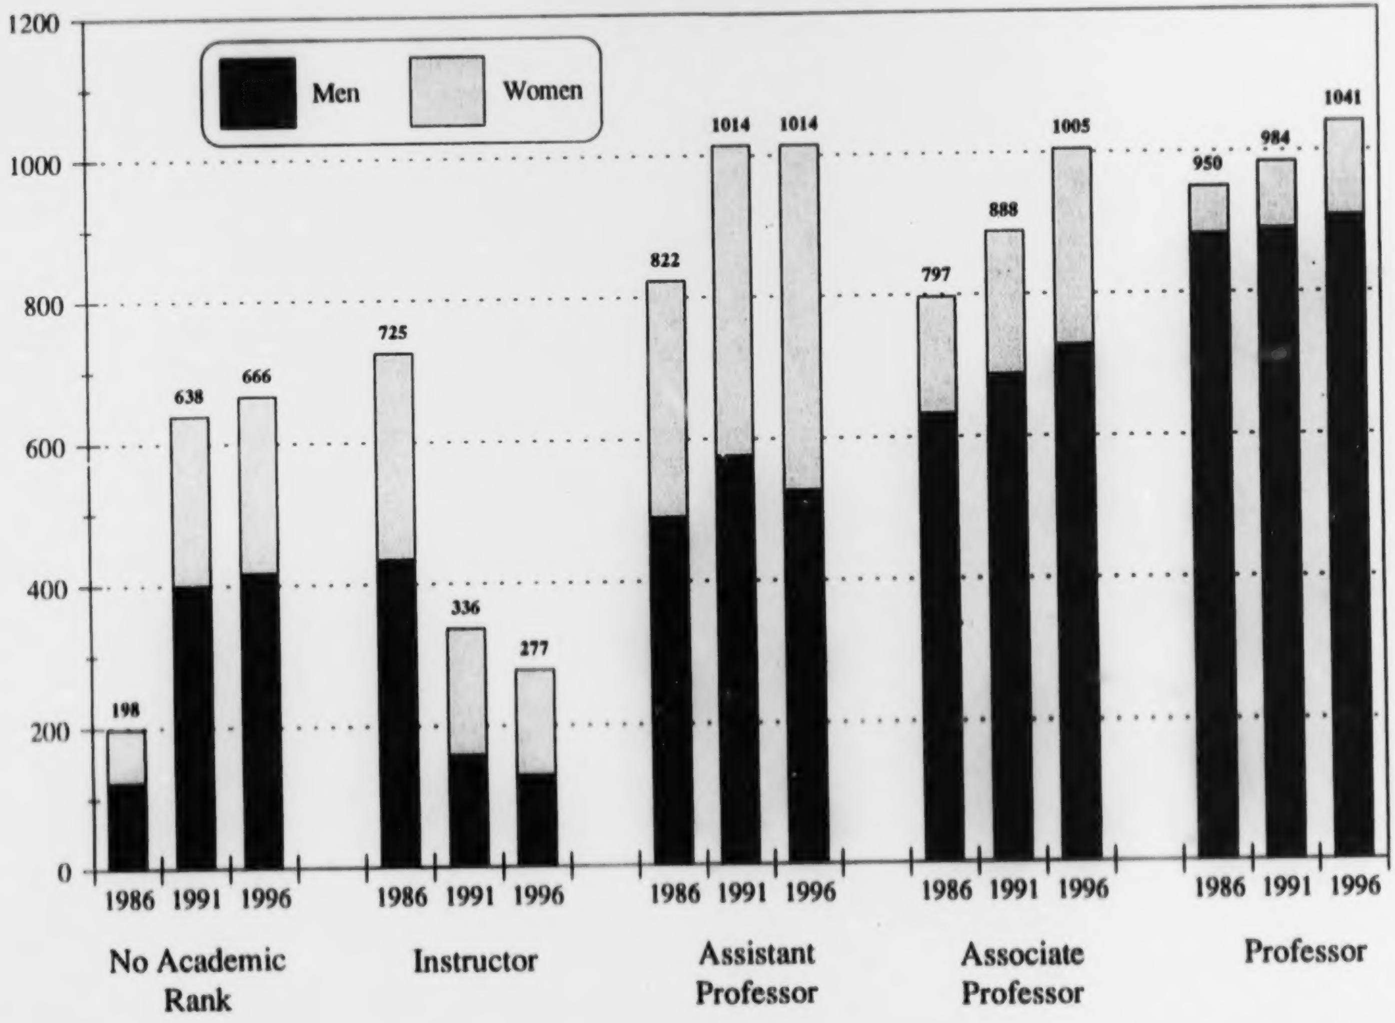
FULL-TIME INSTRUCTIONAL FACULTY DISTRIBUTION
BY RANK AND GENDER
NEBRASKA PUBLIC AND INDEPENDENT COLLEGES AND UNIVERSITIES
1986 - 1991 - 1996



COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Percent Females of Full-time Instructional Faculty by Rank at Nebraska's Public and Independent Colleges and Universities - Fall 1986-1991-1996

- For Fall 1996, the number and percentages of female faculty by rank at Nebraska's Public and Independent Colleges and Universities were as follows: 1,041 professors with 13% females; 1,005 associate professors, with 27% females; 1,014 assistant professors, with 48% females; 277 instructors, with 53% females; and 725 no academic rank, with 39% females. Lecturers included only 49 faculty, so percentages are not reported for this group.

- Except for the no academic rank group, the percentage of males increased directly with academic rank. That is, the percentage of professors that are male is higher than the percentage of associate professors that are male. Conversely, the higher up the professional rank the lower is the percentage of women.

- For Fall 1996, the number of women in the instructor rank exceeded the number of men. The instructor rank included 147 females and 130 males for a total 277 faculty.

- The following table shows an increase for the percentage of females among full-time instructional faculty from 1986 to 1996:

Rank	Fall 1986	Fall 1989	Fall 1991	Fall 1994	Fall 1996
Professor	7%	9%	9%	11%	13%
Associate Professor	20%	19%	22%	25%	27%
Assistant Professor	40%	41%	43%	46%	48%
Instructor	40%	42%	53%	54%	53%
No Academic Rank	38%	36%	37%	39%	39%

- The professor rank displays slight increasing percentages of women. For Fall 1996, this reached 13%. This percentage of professors who are women is quite low relative to the percentages for other ranks.

- For 1986-1996, the associate and assistant professor ranks show increased percentages of women. The Fall 1996 percentage of full-time female faculty was 27% at the associate rank and 48% at the assistant professor rank.

- For Fall 1996, the no academic rank faculty included 686 persons, up 346% or about 2 ½ times the Fall 1986 count (198). Whereas the percentage of females is increasing for the instructor rank, it is steady at about 38% females for no academic rank faculty.

- From Fall 1986 through Fall 1996, there was a trend of increase for all ranks in the percentage of full-time female faculty. This trend can be observed by a comparative of the shaded areas in the graphic on a preceding page.

- The data for this summary are from the table on the next page. This provides additional details for percentage of women by rank for each institutional sector.

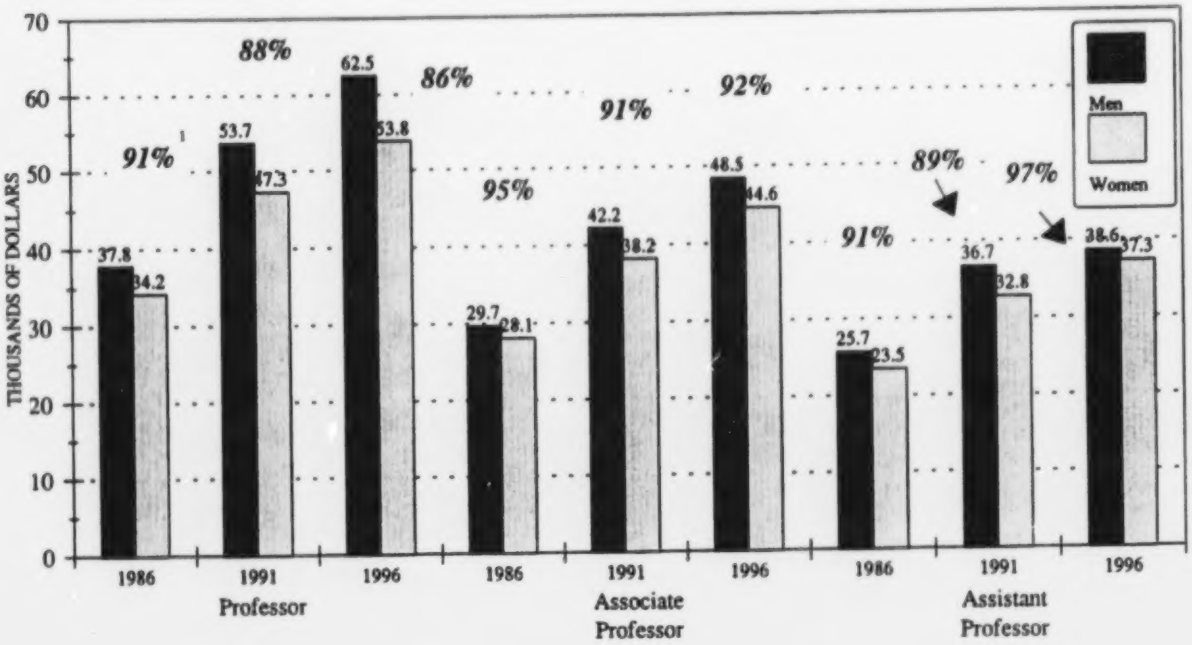
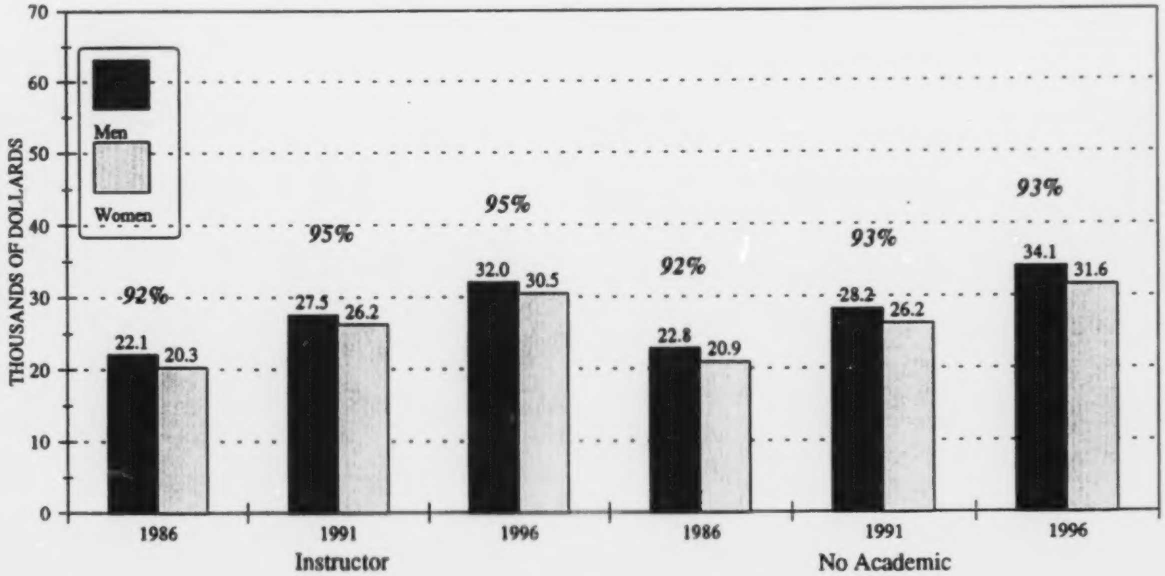
---

[1] Kearney was in the State College system through 1990-91. Beginning in 1991-92, Kearney was reported with the University system. The 1986-87 and 1991-92 numbers are taken from previous IPEDS reports. The 1996-1997 data are from Table D5.

FULL-TIME INSTRUCTIONAL FACULTY AVERAGE SALARIES
BY RANK AND GENDER
AND THE RATIO OF WOMEN'S TO MEN'S AVERAGE SALARY AS A PERCENTAGE
FALL 1986-1991-1996





[1] The data for this graphic appear on the two following pages. The 1996-97 data are from Table D5. The other numbers were taken from previous IPEDS reports.

*Salaries are computed on a 9-month basis

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Average Salaries of Full-Time Instructional Faculty by Rank and Gender

Because an earlier section describes trends in salaries by sector, this section provides a time line view of average salaries by academic rank and gender.

A further breakout to the sector and individual institution level appears in Table D5 for Fall 1995 and Fall 1996. Earlier *Factual Look at Higher Education* reports contain comparable data for the prior years including Fall 1986 and Fall 1991.

- At the professor rank for Fall 1986, the ratio of female average salaries to male average salaries was .906 (=34,226/37,783). In Fall 1986, female professors earned on average a salary that was 91% of the average salary for male professors. For Fall 1991 and Fall 1996, the ratio was 88% and 86%, respectively. For these years, females in Nebraska lost in competition with men for increased average salaries at the professor rank.

- At the associate professor rank for Fall 1986, Nebraska's female associate professors earned an average salary that was 95% of the average for male associate professors. For 1991 and 1996, the comparable ratios were 91% and 92% . Compared to male associates, female associate professors in Nebraska had slightly less competitive salaries in 1991 and 1996 compared to Fall 1986.

- Relative to the professor and associate professor ratios, the assistant professor ratio of female to male salaries has moved toward equal pay. For Fall 1986, 1991 and 1996, the female assistant professor average salary ratios were 81% , 89% and 97% of men's salaries. From these data it appears Nebraska female assistant professors are moving toward salary equity. The 97% rating for 1996 is the nearest to equal (average) pay for any of the ranks - professor, associate, assistant, instructor, and no academic rank.

- The instructor and no academic rank categories had quite similar average pay profiles. The principal difference was a slightly higher average for males designated "no academic rank" over males with title "instructor". The no academic rank group had a substantial average salary increase for men between Fall 1986 and Fall 1996. The instructor profile moved toward pay equity for women with average salary ratios 92%, 95% and 95% of male instructor's average salary for Fall 1986, 1991, and 1996, respectively. The no academic rank category was relatively unchanged with females at about 93% of male average salaries for Fall 1986, 1991, and 1996.

- Although some ranks appear to be moving toward equal pay for men and women at Nebraska's Public and Independent Colleges and Universities, no rank achieved equal pay for the Fall 1986, 1991, and 1996 terms. The assistant professor level was nearest to having gender pay equity for 1996 with females paid at 97% of male average salaries.

The data for this summary appears on the following page and in Table D5. The data for 1986-87 and 1991-92 appear in earlier "A Factual Look at Higher Education in Nebraska" reports.

[1] "Creighton University operates a medical school which is affiliated with and rents space from AMI/Tenet through a joint venture which gives Creighton University a minority non-controlling share in Creighton St. Joseph Regional Healthcare System. The University is not involved in the day to day management of the Hospital." (By Creighton Accounts Payable and Property Manager, Dec. 14, 1995). Based on the available information, related Creighton University hospital revenues are included with "Other." Of the funds generated by hospital/medical related activities a breakout of expenditures is not currently available for the percentages of these funds that are being used for student education centered versus other activities, including hospitals.

Average Salaries of Full-time Instructional Faculty, Nebraska Public and Independent Colleges & Universities Fall 1987 Through Fall 1996[1]

- An evaluation for all Nebraska Public and Independent Colleges and Universities for Fall 1987 through Fall 1996 shows an increase from 3,405 full-time instructional faculty to 4,072. This is a 2.2% average annual increase.

- For the same ten years, the average salaries for full-time faculty increased from $29,439 to $44,879. This is an increase of 52.4% in actual dollars, for an average increase of 5.8% per year.

- The following table displays average salary changes between Fall 1990 to Fall 1996 for full-time faculty giving the (1) increase in actual average dollar salaries and (2) the real buying power increase based on the cost-of-living, by the CPI-U index.

			Percentage Increase from Fall 1990 to Fall 1996			
	Fall 1996	Fall 1990 to Fall 1996	for Actual Average Dollar Salaries/ 6 years		In Real Buying Power for Average Salaries/ 6 years	
Rank	Count	Actual Dollars Increase 1990-96†	Total Increase	Average Annual Increase	Total Increase	Average Annual Increase
Professor	1,041	$10,670	21%	3.5%	2.3%	0.4%
Associate Professor	1,005	$8,359	21%	3.5%	-0.9%	-0.2%
Assistant Professor	1,014	$4,543	13.6%	2.3%	-4.0%	-0.7%
Instructors	277	$5,130	20%	3.3%	1.2%	0.2%
No Academic Rank	686	$6,481	24%	4.1%	5.1%	0.8%
Lecturer	49	*	*	*	*	*

* The reliability of a calculation is questionable because it is based on 15 records for Fall 1990 and 49 records for Fall 1996; therefore, no percentage is reported.

† The dollar amounts used are average salaries of full-time faculty. This does not provide a total summary because part-time, adjunct and other instructional staff are excluded. Salaries are computed on a 9-month basis.

- For the professor rank, the **actual** average salary for Fall 1996 was up 21% above the average salary for Fall 1990. Deflated by the Consumer Price Index,[2] the buying power increased by 2.3%. Stated otherwise, for the period from Fall 1990 through Fall 1996, the full-time professors' average salary increase exceeded the (cost-of-living) inflation rate by 2.3%. On average their pay increased per year by about 0.4% (less than ½ of 1%) beyond inflation.

- Comparable percents appear for other faculty ranks. For example, the "no academic rank" category actual average annual dollars increased by 4.1%. This equates to an average annual increase of 0.8% in buying power.

---

[1] Salaries are computed on a 9-month basis. This data summary uses Tables D1, D3 and page 49.

[2] CPI (Consumer Price Index) Detailed Report, October 1996, by the U.S. Department of Labor, Bureau of Labor Statistics. The CPI-U annual average index was used as a deflator to define cost-of-living adjusted average salaries. The CPI-U index covers approximately 80% of the U.S. population.

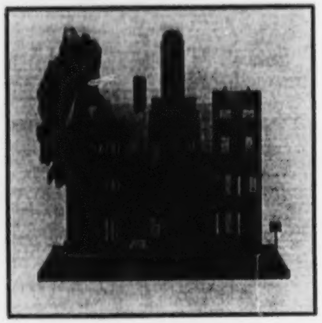
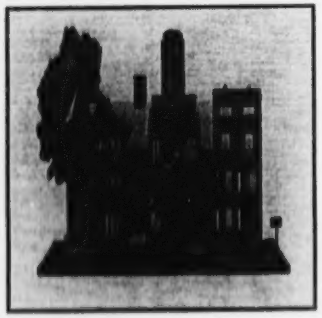
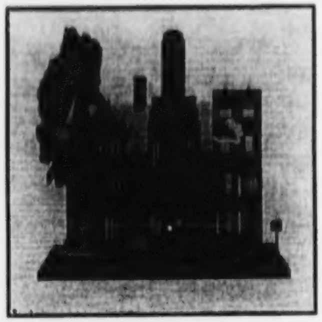
Private Career Schools







COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Headcount Enrollment in Nebraska's Private Career Schools - Fall 1996

- Headcount enrollment was available from IPEDS surveys for categories including full-time and part-time status, by gender, and by race/ethnicity.

- Of the Private Career Schools reporting, all (100%) reported more full-time than part-time enrolled.

- The total headcount enrollment was 2,267 students for the 18 reporting Private Career Schools. Of these students, 2,072 (91%) were enrolled full-time.

- The number of women enrolled was 1,844, or 81% of the total. More men than women were enrolled at Universal Technical Institute. Otherwise, more women than men were enrolled at each of the reporting Private Career Schools.

- The enrollment composition by race/ethnic category was Non-Resident Alien: 6 (0.3%); Black Non-Hispanic: 225(10.0%); American Indian/Native Alaskan: 12 (0.5%); Asian and Pacific Islanders: 16(0.7%); Hispanic: 53 (2.4%); and White Non-Hispanic: 1,936 (86.1%). The 19 students of unknown race/ethnicity origin were excluded from this summarization. Relative to the 1990 Census of Population, Nebraska residents aged 18+ years, this distribution has greater percentages of Black Non-Hispanic, and White Non-Hispanic persons, and fewer Non-Resident Alien and Asian/Pacific Island persons.

The data for this summary are from Tables E1, E2, and E3 in Appendix E.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Degrees and Other Formal Awards Granted at Nebraska's Private Career Schools - 1995-96

- The number of degrees and other formal awards granted at Nebraska's Private Career Schools was available from IPEDS surveys for categories including gender and race/ethnicity.

- Of the 1,205 graduates or completers reported, 1,011, or 84%, were women. While most programs graduate more women than men, Universal Technical Institute reported more male completers.

- Race/ethnicity was known for 1,195 (99%) of the 1,205 private career school degree and other award completers. Of those with known race/ethnicity 8.8% were White, Non-Hispanic, 9% were Black, Non-Hispanic, 1.8% were Hispanic, 0.8% were Asian and Pacific Islanders, 0.25% were American Indian or Alaskan Natives, and 0.2% were Non-Resident Aliens.

The data for this summary are from Appendix E, Tables E4 and E5.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

Some Notes about the Data

The data for Nebraska's Public and Independent Colleges and Universities were taken directly from the IPEDS (Integrated Postsecondary Education Data System) survey forms, submitted annually by the public and independent institutions at the request of the U.S. Department of Education. The information collected for the Private Career Schools is for enrollments and degrees and awards. There is no data herein for finances and faculty salaries for the Private Career Schools. Also, the Private Career Schools are ones that are eligible to participate in federal financial assistance programs authorized by Title IV of the Higher Education Act of 1965. Other Private Career Schools in Nebraska have chosen to not participate in the IPEDS survey, so are not in this report.

Through 1991, data reported for the University of Nebraska - Lincoln includes the Nebraska School of Technical Agriculture, NCTA, a two-year institution located in Curtis, Nebraska. This is simply a matter that the data are combined on the database, and the data are not otherwise available for a separation. Beginning with the 1992 survey, NCTA data are listed separately from UN - Lincoln.

The Commission reports faculty salary information on a 9-month basis, computing all 11/12 month faculty contracts to 9-month contracts where necessary. Although the number of months (nine) is consistent, this report does not take into account the number of work days within each academic term.

Additionally, Kearney State College became the University of Nebraska at Kearney on July 1, 1991. It is listed as UN - Kearney with data placement for all years in the University System. Exceptions are noted in the data tables.

In 1997 Central Community College Area provided the Commission with revised headcount enrollment numbers for Fall terms 1987 through 1996. Compared to the previous reporting, the headcount enrollment numbers are substantially smaller. Previous reporting was based on Central's continuous enrollment practice, and included an adjustment to reflect off campus center enrollments. Now Central Community College Area's Fall term headcount enrollments are based on the given year Fall term paid enrollments as of October 15. Other information remains unchanged including numbers for degree completions, faculty salaries and finance IPEDS surveys. Any inquiries about this change are directed to the Educational Services office at Central Community College Area, Grand Island.

The Coordinating Commission for Postsecondary Education appreciates the efforts and cooperation of registrars, business officers, research analysts, and IPEDS Coordinators at the many institutions surveyed.

*NOTE: NCTA - CURTIS' FTE ENROLLMENT FOR FY88-89 WAS REPORTED WITH UN-LINCOLN.

---

[1] The data source is the Nebraska Education Data System, NEEDS. This system surveys public postsecondary institutions only. For the Community College Areas, the NEEDS definition of "annual" is the 12-month fiscal year. For the University and State College sectors "annual" is defined as the academic year.

*IN JUNE 1997 AT THE TIME THIS REPORT WAS PREPARED, THE UN-LINCOLN DATA WERE NOT REPORTED BY THE INSTITUTION.
**THE HIGHER ENROLLMENT COUNT AT THE SIDNEY CAMPUS IS DUE TO ADJUNCT COURSES (FOR EXAMPLE, SAFETY) OFFERED DURING THE SPRING TERM
***THE TOTALS ARE OMITTED BECAUSE OF INCOMPLETE DATA COUNT. UN-LINCOLN'S 1996-97 DATA ARE MISSING.

*"Creighton University operates a medical school which is affiliated with and rents space from AMI/Tenet St. Joseph's Hospital. We are affiliated with AMI/Tenet through a joint venture which gives Creighton University a minority non-controlling share in Creighton St. Joseph Regional Healthcare System. The University is not involved in the day to day management of the Hospital." (By Creighton Accounts Payable and Property Manager, Dec. 14, 1995). Based on the available information, related Creighton University **revenues** are included with "Other." Of the funds generated by hospital/medical related activities a breakout of **expenditures** is not currently available for the percentages of these funds that are being used for student education centered versus other activities, including hospitals.

Nebraska Private Career Schools Totals	**2072**	**195**	**2267**

*Alegent Health was formerly reported as Bergan Mercy and Immanuel Medical Center. The change is the result of a buyout and subsequent merger of the two programs.

*Joseph's College of Beauty includes Beatrice, Grand Island, Hastings, Kearney, Lincoln, Norfolk and North Platte.

*Vatterott bought the Business and Banking Institute in Omaha June-July 1996 which included a teachout. On October 15, 1996, the enrollment reporting date there remained one student to complete the teachout. Since October 1996, Vatterott has received Nebraska licensure, and enrollment has increased.

COORDINATING COMMISSION FOR POSTSECONDARY EDUCATION

A FACTUAL LOOK AT HIGHER EDUCATION IN NEBRASKA
AUGUST 1997

FEEDBACK

To enable the Coordinating Commission for Postsecondary Education to better serve your needs for information about trends affecting colleges and universities, please take few minutes and give us some feedback.

1. What additional comparative data on Nebraska Postsecondary Education would you find useful?

2. What comparative data that are currently presented are of little or no use to you?

3. Are the proportions of (1) institution's profiles, (2) charts/graphs, and (3) data tables about right? Which do you find most helpful?

4. In the tables, is the balance of raw data and percent changes about right for your use?
